RE: Splitting Claim per Change of ownership.

Sally, the split tree I am giving you is going to look weird. . . . Or wrong. The acreage distribution on the claim is different than what was recommended. So we need to split the claim so we can still recommend each child of the parent accurately.

So when you look at it and it all seems wrong, it is actually the way I want it to be done please.

When it's split, I can update the recommendations as they should be and the shape files for the recommendations. I just need files and claim numbers.

I do not know what the practice is for notifying claimants of a split at this stage in the game. Personally, I think the preliminary mailing will be notification for them and wouldn't sent a correspondence letter unless you feel we should.

Thanks.
