Boise, Idaho 83720-0098

Dear Mr. Fritschle

I have examined all soil maps available and can find no further evidence to support the area irrigated in the original claim, beyond that already submitted.

The area your (37-21960) which you have outlined on your new map, consist partly of a steep rocky ridge covered by Sumac, Squaw Brush, Russian Olives and Grease Wood. This is marked area A_D on my submitted map. This area has not been irrigated & cannot be traversed with farm equipment.

The area irrigated before 1958 is marked on the submitted map in black ink. This includes much of the area you circumscribed. The darker areas shows availability of water to deep rooted plants in contrast to the lighter area which is irrigated only.

The area concerned in (37-7746) is outlined on the second map.

Without further evidence to submit I think the above represents the areas of concern.

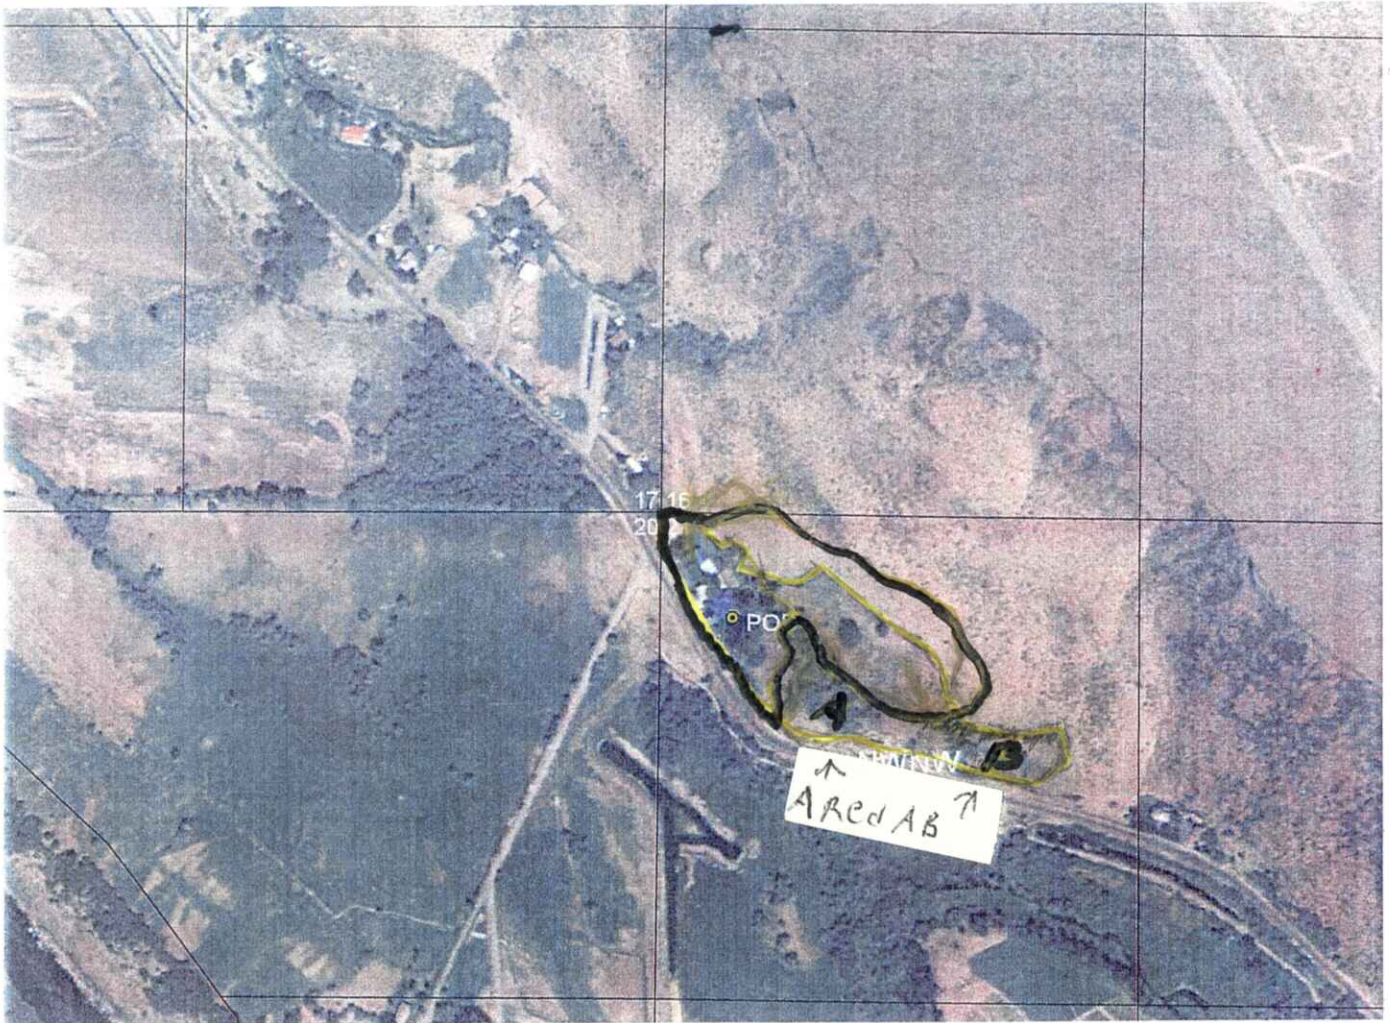

If you have further questions please call or write.

respectfully submitted:

Duane Cutright
