Re: Water Right Protest

When we submitted our documentation for our water rights we had a total of 5.264 cfs of water rights from all rights. As a result of this adjudication our CFS has been reduced to 4.10 and our dates of priority have been changed from 1919 and 1913 to 1943. We submitted documentation as requested. Also, some rights have been disallowed.

When we purchased our ranch in 2000 we based our purchase price on the amount of water that was in the water right 5.264 cfs. Had the water right been less, the price we offered would have been decreased. The reduction in the water right will diminish the value of the ranch. At this time if the 5.264 cfs right and storage right is not allowed what type of compensation will you be offering to us- we will seek and use legal counsel to pursue this matter..

We disagree with findings relating to our water rights.

John and Denyse Field
