1. The first step in the process of identifying a problem is to define the problem. This involves identifying the symptoms and the underlying causes of the problem. Once the problem has been defined, the next step is to identify the stakeholders who are affected by the problem. This involves identifying the individuals, groups, and organizations that have an interest in the problem. The third step is to identify the resources that are available to address the problem. This involves identifying the people, money, and other resources that can be used to solve the problem. The fourth step is to develop a plan of action. This involves identifying the steps that need to be taken to solve the problem. The fifth step is to implement the plan. This involves putting the plan into action. The sixth step is to evaluate the results. This involves assessing the effectiveness of the plan and making adjustments as needed. The seventh step is to communicate the results. This involves sharing the results of the process with the stakeholders. The eighth step is to monitor the results. This involves tracking the progress of the process and making adjustments as needed. The ninth step is to report the results. This involves providing a final report on the results of the process. The tenth step is to conclude the process. This involves ending the process and moving on to the next step.

1. The first part of the document is a list of the names of the members of the committee, followed by a list of the names of the members of the sub-committee. The names are listed in alphabetical order.

1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.

2. Next, it is important to gather relevant information and data. This can be done through research, consultation with experts, or by analyzing existing data sets.

3. Once the information is gathered, the next step is to develop a plan or strategy to address the problem. This may involve breaking the problem down into smaller, more manageable parts.

4. The fourth step is to implement the plan. This involves putting the strategy into action and monitoring progress along the way.

5. Finally, it is essential to evaluate the results and determine whether the problem has been successfully solved. If not, adjustments may need to be made to the plan or strategy.
