5. ☐ Point(s) of Diversion

9. ☒ Place of Use
10. ☒ Claimant's Proposed General Provisions

11. Recommendation:
- ☐ This water right should not exist
- ☐ This water right was not recommended, but should be recommended with the elements described above.

BRIEF EXPLANATION FOR RESPONSE.

The water right should be decreed as previously decreed and recommended. With respect to the source, there is no basis in fact or law to add the language requested by the Objector that would purportedly bifurcate and somehow change the source designation of individual groundwater rights held by "shareholders or interest holders" of the Objector. Licensed and decreed groundwater rights held by individuals that may be located within the Objector's service area and that identify a specific source, i.e. groundwater, cannot be changed by an objection to the above-referenced surface water right held by the Objector.

In addition, the source for this surface water claim has been previously determined by a prior decree and cannot be changed by way of an objection in the SRBA. With respect to the priority date, there is no basis in fact or law to add the language requested by the Objector that would purportedly change the priority date for licensed or decreed groundwater rights held by individual "shareholders or interest holders" of the Objector. With respect to the place of use, there is no basis in fact or law to include the remark that would purportedly change the place of use of this previously decreed surface water right, or the place of use identified in licensed or decreed groundwater rights held by individual "shareholders or interest holders" of the Objector. Finally, there is no basis in fact or law for the "separate stream" provision sought by the Objector.
