This was an illegal transfer. Ken Schoessler transferred approximately 1.47 CFS from Baseline Pump #2 to his own personal well. This is a supplemental well that is used on a rotation basis. Water cannot be taken out of the well; it must stay in the rotation system for use by the Association members. When the transfer was applied for, the Association was not contacted, resulting in an illegal transfer. Consequently, those who have been paying Association dues all of these years had no idea that water was transferred out. In addition, at the time of the transfer, there were 1000 shares in Pump #2. The water that was taken out was taken out in inches not shares, meaning no water can be taken out of the well.

The CFS is lower than it should be.

The CFS should read 8.23
