RE: Water Rights Number 67-14244
James C. Amstutz

Dear Gentlemen:

I received your letter of January 10, 2007, concerning your recommendations for water rights in basin 67.

Attached to your letter were several water rights for the USDA-forest service, and I could not figure out how they related to Mr. Amstutz. They were forest service rights 67-12139, 67-14817, and 67-12241.

When Mr. Amstutz purchased this property we had communication with your department relating to water rights 67-07321, 67-10,351, 67-04,417, and 67-04023. These water rights had substantial land associated with those rights and documentation was sent into your department reflecting these water rights.

I am enclosing the documentation concerning those water rights, which we understood were transferred from the prior owners to Mr. Amstutz. From the information I received from your office in relation to the water right number 67-14 244, it does not appear all of these water assignments were completed.

I do note from my information that water right number 67-10351, appears to relate to the same 13,000 gallon per day flow. I would appreciate your researching your records on these water rights to see that they have been properly assigned to my client.

Form 42-248/42-1409(6) March 26, 1999

INSTRUCTIONS

This form has been prepared to assist new owners of property to comply with the requirements of Sections 42-248 and 42-1409(6), Idaho Code. Section 42-248 requires certain property holders to notify the Department of Water Resources (IDWR) of any change in mailing address or ownership of all or part of a water right record on file with IDWR. Section 42-1409(6) provides that new property owners must notify IDWR of any change in ownership of a water right during an adjudication of water rights. Required claims may be filed by a new owner.

Separate brochures are available from IDWR describing the adjudication of water rights and the requirement to notify IDWR of changes in ownership. Please contact your nearest IDWR office, or call 1-800-451-4129, if you would like more information or need help completing this form. Please attach additional sheets to the form if you require additional space to describe or explain any of the items on the form.

1. If there are water rights associated with the property, the seller should be able to provide you with the water right or adjudication claim number(s). Please enter these number(s) at Item 1. If you or the seller believes there are water rights for the property but the numbers are unknown, you may wish to contact IDWR for assistance in identifying the water rights for the property in question. If claims for the rights are required, and have not been filed, IDWR will so advise you.
2. The information described at Item 2 is required, since IDWR cannot process the requested change without documentation of ownership. The preferred types of documentation are shown; contact IDWR if you have difficulty obtaining this information. Do not obtain a new survey for purposes of this form before contacting IDWR.
3. Please provide the name and address of the former owner of the water right and/or adjudication claim at Item 3.
4. The name, mailing address, and telephone number of the new owner(s) is entered at Item 4. Please indicate the relationship between multiple owners by using the connector 'and', 'or', or 'and/or'. If an 'and' is used, all parties must sign this form. If an 'and/or' or 'or' is used, all parties may sign. However, only one of the named parties is required to sign.
5. At Item 5, please provide the date the property in question was acquired. This may be the date of "closing" in the case of a real estate transaction or the date of court order for other types of ownership changes.
6. You may be purchasing only a portion of the total water right held by the seller. This means the water right held by the seller may be "split" to provide your share of the right in question. Be sure to include a description of the portion of the water right you have purchased at Item 6.

Please provide as much detail as possible concerning your portion of the water right: include the number of homes you acquired, number of acres irrigated with your portion of the right, if it is more than 1/2 acre, type and number of stock if your portion of the right includes stockwater, etc. In the absence of information to the contrary, IDWR will assume the intent is to split the rights proportionately.

7. The new owner(s) must sign the form in the space(s) provided at Item 7. Corporations and other organizations must submit a list of directors or officers demonstrating the authority of the director or officer to sign the form.
8. There is no filing fee. When complete, you should retain a copy and return the original of the form to the IDWR office nearest you:

RE: 67-04417 Amstutz (formerly Craig)

<u>SUBCASE</u>	<u>CLAIMANT</u>	<u>OBJECTOR</u>	<u>RESPONDENT</u>
67-04417	Amstutz	BLM	Semanko's Bunch

I have taken the deed that you were kind enough to provide and plotted the boundaries of Amstutz's property on a map (thick solid line). I also plotted all of the currently filed water claims in that area, so that we can determine if there are any water sources on Amstutz's property that have not been claimed in the SRBA. I have found a number of interesting things:

1. There are a number of water bodies (i.e. springs, ponds, reservoirs) shown on the U.S.G.S. map lying within Amstutz's property that have not been claimed in the SRBA. If there is water at these sites, then we could amend this claim through a Standard Form 5 (SF-5) to include these sources.

T12N R01W S10	SWNWNW	Spring	} circled on map
	SWNESW	Playa, pond, or reservoir	
	NENWSE	Playa, pond, or reservoir	
S16	NENESE	Playa, pond, or reservoir	

2. There are a number of intermittent streams depicted on the U.S.G.S. map, that I have accentuated with a dashed ink line which have not been claimed in the SRBA. I don't know if these (or a portion of) are suitable for asserting water claims or not, but your client should be able to tell us. Any stream segments that were overlooked could be added this claim via an SF-5 (amended claim).

3. Several stream segments are currently described by this claim and are represented by the solid ink line that I have drawn on the map. The squares (solid line) that I have drawn on the map represent the boundaries of the 40 acre tract Places of Use (POUs) recommended in the Director's Report. The 40 acre tract boundary lines that I have drawn in with a dashed line represent POUs that I believe are missing from the claim and should be added in order to complete the stream segments claimed. These POUs can be added to the claim via an SF-5 (amended claim).

MISSING POUs WITHIN STREAM SEGMENTS RECOMMENDED:

It appears that the point of diversion was incorrect on the license. The location of the well has not changed since initial development of the system, however, it appears that the correct legal description is as identified on this claim.
