I. FINDINGS OF FACT

A notice of claim was filed for the above-captioned water rights pursuant to I.C. § 42-1409. The Director of the State of Idaho Department of Water Resources (IDWR) examined the water system for this reporting area. The *Director's Report* contained a recommendation or abstract for the elements of these water rights.

On June 15, 1999, the United States of America, Department of Interior, Bureau of Land Management (BLM) filed objections to the *Director's Report* for water right claims 61-00356, 61-00357, 61-02242, 61-02243, and 61-07231¹. On July 28, 2005, the BLM, voluntarily dismissed its objections, which were resolved by the filing of *Notices of Completed Administrative Proceedings* in each subcase.

A *Special Master's Report and Recommendation* was issued for the above-captioned water rights on January 30, 2007. On February 13, 2007, the SRBA Court received correspondence from IDWR stating that the recommendation contained a remark under the place of use element that should not have been included. The correspondence also represented that the attorney for the claimant agrees that the remark should be removed. Accordingly, this *Amended Special Master's Report and Recommendation* recommends that the water rights be decreed without the subject remark.

¹ As to water right claims 61-00349 and 61-00353, no objections were filed in these two subcases, but they were processed along with the related water right claims to which objections were filed.

II. CONCLUSIONS OF LAW

Therefore based on the file and record herein, IT IS RECOMMENDED that water rights 61-00349, 61-00353, 61-00356, 61-00357, 61-02242, 61-02243, and 61-07231 be **decreed** with the elements as set forth in the attached *Amended Recommendations for Partial Decrees*

Pursuant to I.R.C.P. 54(b).
