

Figure 1. A schematic diagram of the experimental setup. The subjects were seated in a dimly lit room and viewed the screen through a mirror. The screen displayed the target and the starting position of the hand. The hand was moved from the starting position to the target position by the subject's own effort. The hand was then moved back to the starting position by the subject's own effort. The hand was then moved back to the starting position by the subject's own effort. The hand was then moved back to the starting position by the subject's own effort.
