I. FINDINGS OF FACT

Notices of claim were filed for the above-captioned water rights pursuant to I.C. § 42-1409. The Director of the State of Idaho Department of Water Resources (IDWR) examined the water system for this reporting area. The *Director's Report* contained a recommendation or abstract for the elements of these water rights.

On April 20, 2006, the United States of America, Department of Interior, Bureau of Land Management, filed an objection to the *Director's Report*, asserting that the place of use should not include federal public land. On March 19, 2007, the parties filed a *Standard Form 5 – Stipulated Elements of a Water Right* in each of the subcases, which resolved the objections by means of redrawing the common digital boundary for the water rights to exclude the federal public land. The Idaho Department of Water Resources concurred with the stipulations.

II. CONCLUSIONS OF LAW

Therefore based on the file and record herein and pursuant to the *Standard Forms 5*, IT IS RECOMMENDED that the above-captioned water rights be **decreed** with the elements as set forth in the attached *Recommendations for Partial Decrees Pursuant to I.R.C.P. 54(b)*.
