RE: Investigation into recommendation for 74-2047G

Paula and Bill Guth came into the office on April 3 concerning the hearing on the objection they filed against the recommendation for 74-2047G. The claim was recommended as disallowed with the condition, "Recommended as right nos..." The Guths wanted some clarification on why the claim was recommended as disallowed.

I examined a copy of the decree for 74-2047B, which 74-2047G is split from, as well as a copy of the map from the Lemhi decree scanned by IDWR. The decreed POU for 74-2047B includes the POU claimed for 74-2047G. The map from the Lemhi decree appears to show the Guth taxlot outlined as a POU, given that other areas are circled with the word "DRY" written inside. The Guth property is outlined but does not include the word "DRY." Therefore, we are assuming the outlined POU was indeed an active one at the time of the Lemhi decree in 1982.

I also spent some time reviewing the split history for 74-2047B, attached here. Not all of the decreed diversion rate or the decreed acreage is currently recommended. Since there is diversion rate and acreage still available under the decree, it seems we could recommend the Guth acreage as active and preserve more of the original water right.

I was unable to find delivery records before 1994, but 1994 and 2003 watermaster records show the Guths were being charged for water from 74-2047B. This supports continued use of the water. If the water right was unused for some time, these recent watermaster records would then support resumption.

74-2047B was decreed with 24.8 acres in T21N R22E Sec 11 SWSE and splits were recommended in the SRBA with a total of 24.1 acres in SWSE. I have made a preliminary shapefile outlining the 74-2047G POU and it appears to be about 4 acres. If we reversed our original recommendation and made 74-2047G active, the recommended POU in SWSE for all splits of 74-2047B would be about 28.1 acres, above that decreed in the Lemhi adjudication. However, other QQs in the decreed POU were under-recommended and it is not uncommon for us to recommend acreages in the SRBA as slightly different than those of previous adjudications.

In conclusion, I have found good evidence that 74-2047G should have been recommended as active.

[illegible]

MVB notes 4/4/2007:

74-15442 - I think cfs is over-recommended. 1 inch per acre would be 0.08 cfs.

74-2047E - Not in decreed QQ. Recommended for stock. Already partially decreed.

74-2047G - is currently disallowed. Can find about 4 acres of irrigated land in taxlot. Mr. and Mrs. Guth have filed an objection.

74-2047P - is recommended at greater cfs than claimed (0.09 v. 0.056)

Acreage un-recommended:	13.9
CFS un-recommended:	0.64
