Re: Large POU map for Lenroot Canal and Reid Canal

Met with Lynn Nelson and Glen Munns today to discuss their map. This was in direct response to questions raised yesterday in my discussion with Rod Robison of the Reid Canal. Glen Munns has Reid shares on a portion of his land and Lenroot shares on the rest of his land. Glen identified the acreage irrigated by the Reid Canal and I created a shape in my place of use theme corresponding to the Reid shares. The Reid shares are located in a portion (28 acres) of the west half of the NW quarter of section 30.

According to Lynn Nelson, the SWNE and the east half of the NW quarter of section 35 (the Dee Bowen place) is irrigated with Reid and Lenroot shares and the shares from both canals can be used anywhere on the place. Yesterday, Rod Robison said that the Reid has 40 acres on this land. Lynn Nelson said that he would let me know the number of acres the Lenroot has on the place.

Rod Robison said that the land where the freeway crosses the Reid Canal service area was all irrigated prior to its construction. He said Rainbow Lake and vicinity was also irrigated up through 1978.
