AFFIDAVIT

RECEIVED

APR 27 2007

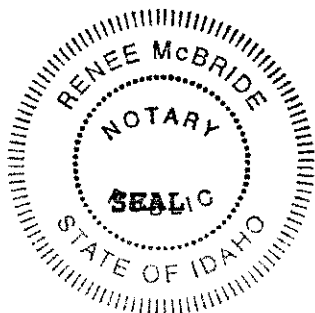

DEPARTMENT OF
WATER RESOURCES

D. Neil Hill being first duly sworn,
deposes and says: Around 1950 The Lava

Cemetery was changed from a dry
weed patch to a cemetery with
green grass - a well was dug
and a pump installed and
irrigation was established - In 1956
a larger pump was put in and
3 phase electricity was there also
making this more efficient and cheaper.

A canal was dug from Lava around
the hill to the cemetery in 1913 supplying
water to those in between - The cemetery water
was put through a pump and used to
water the cemetery in addition to the well also
in the Early to mid 50's.

D. Neil Hill

Subscribed and sworn to before me this
day 25 of April, 19 2007.

Renee McBride
(Notary Public)

Residing at Lava Hot Springs.

My Commission Expires May 31 2012.

February 29, 2004

To whom it may concern,

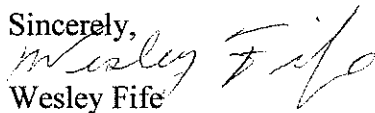

My name is Wesley Fife.

I have been asked to write this letter in reference as to when the water pump at the cemetery was rewired to take advantage of 3 phase power.

As I remember my father Mr. Leon Fife who owned and operated Fife Motor Co., had me watch the garage for him while he rewired the pump to take advantage of the cheaper 3 phase power that had become available at that time. As close as I can remember the date of this work was just before I went into the military, which was in July of 1956.

I am sure that there was a pump in operation before this work was performed by my father because he was changing the wiring and not installing the initial wiring for the pump.

Sincerely,

Wesley Fife
