This exam was done on Nov 8, 2004 with Josh Reese of M-R Ranches who have leased the Craig Clark properties for about 7 years

Photo #8 shows the supposed source of the "Spring" water for stockwater use. This area is dry & located on M-R rancher property. Photo #8 looks West. Photo #9 is taken from the same spot looking East. Water would have to cross the Antelope Creek Rd (pictured) to get to Clark properties, in the distance.

There is no culvert or ditch in the area & Josh Reese says he has never seen water flow from this spot.

The implied area of Point of Diversion & Place of use belongs to M-R Ranches & not the claimant, according to Josh Reese. GPS data is: 2530767 GPS File 34-13596 1383631

This claim should probably be disallowed.

* Finally, the Clark properties have recently been sold to one Steve Wooley. No evidence of priority submitted.

Exam done by Harold Jones of Water Rights Consulting Services.
