Charles M. Parrish
1030 Military Dr.
Salt Lake City, UT

Dear Mr. Parrish:

Enclosed are the receipts for the two domestic and two irrigation water right claims for wells, received August 10, 1988. Also enclosed is the check and claim received for the reservoir filled with Spring runoff from Fox Creek and Pearl Creek.

I am returning this claim to you because the Idaho Department of Water Resources (IDWR) will not accept a claim to a water right, from a surface-water source, perfected after May 20, 1971, for which an approved permit application has not been filed. I apologize for not making this requirement clear in our previous telephone conversation; I incorrectly assumed the reservoir was in use prior to this date.

The reservoir is included in the water right to irrigate 197 acres in Sections 35 and 36, T4N, R45E (Permit 07347). However, the source of water listed on the permit is from the well located in the SW 1/4 of the SW 1/4, Section 30, T4N, R46E. It does not include a water right for the collection of waste water or spring runoff, nor for any additional acreage.

A permit application must be completed to obtain a water right from a surface water source or any additional acreage not described in previous permits. An adjudication claim is not required.

I have enclosed a permit application. The filing fees are different for the permits than for the adjudication claims. Please refer to the fee schedule in the instructions. If you have any further questions, please call me at 208-525-7161.

Sincerely,

Tony Olenichak
Water Right Agent, SR
