

12/11/06

Dear Sirs:

I have been asked to write my recollections of water delivery out of Teton Creek for land that has been irrigated from springs and is located southwest of Driggs.

Early each spring water was delivered from Teton Creek through ditches to ground east and west of State highway 33 for flood irrigation. Once this water was used it would take 7-10 days for the springs just south and southwest of Driggs to come in. This land is currently owned by Prices, Westons, Henries, and others.

If this water isn't diverted from Teton Creek and used in this area, the springs and sub. water won't come in. That has been my experience during the time I was watermaster (1978-2000).

Sincerely,
Lee O'Brien
