While reviewing the water right recommendation for 78-02047, I've determined that the POD is on NFS land and the forest will contact the owner of the water right about this matter. In addition, the places of use appear to clearly be on private land. I've relied heavily on the maps on the IDWR site. The attached copy of the BLM Master Title Plat also supports my conclusion. The MTP is quite interesting, showing a block of private land within the National Forest with a Homestead Entry Survey 107 and smaller government survey Lots around the HES to "block up" the private land. I want the department to have this map for the 78-02047 water right file.

(See attached file: map.pdf)

If you have any questions about this matter, please contact me. Thank you.
