Re: Split of 22-524A

This morning I made a follow-up phone call to Kenny Warnke about the split of 22-524A. Three months ago he had called our office after receiving an NCAP mailing sent to him on April 11, 2007. The mailing notified him that 22-524A had been split based on the processing of a change of ownership form. When I talked to him in April he was confident that the water right was not included in his sale of a portion of his property to Georgie Stanley. I requested a copy of a deed showing that he had withheld the water right from the sale at that time, and I called back today to see if that had been sent. He indicated today that it had not been sent and that he would try to get that to me right away.
