673	30.95	2500	4/1/1939				decrease to compensate for maximum average monthly diversion.			
Total CFS	268									

In 1975 Wilford had 215 cfs as a maximum average monthly diversion. When Good Luck was added in 1980 through transfer 2046, there was no spike in flow rate. The maximum after 1980 was less than 200. I am using the average of 3 days in July of the year 1975 for my recommendation. July 5,6 and 7. So the maximum I am able to recommend is 268 CFS. I am decreasing thier 1939 priority dates to satisfy that flow rate.
