DEPARTMENT OF
WATER RESOURCES

To I D W R 36-16000

The Littles were the best persons that I know of right now that know about the property that has been irrigated by the waste water.

If this is not enough I ~~will~~ let me know and I will try to find some one that had lived here close and have them write a note about how and when this piece was irrigated.

Jack Livi

Idaho Water Board:

In the year of 1975 we (Jay and Lola Little) purchased the Requa place from Parr and Prince. At that time the 3 acres on the southeast corner was only watered with the waste water that passed through as a natural drain. This has since remained the only way that this property has been watered.
