22-11259	10/01/1889	21.40	TETON RIVER	Note 1
22-11260	04/01/1898	33.60	TETON RIVER	Note 1
Subtotal		59.8		
Total Diversion		93.6		

NOTES:

1. Transfer # 70682, 02/13/2004, adds a POD (T6N, R403 S15 SWSW), for Teton River Claims; Limits acres to 1434.5, Q to 59.80 cfs. Certain rights are referenced as limited to the irrigation of 160 acres. It is unclear from the transfer whether the referenced rights are restricted to the same 160.0 acres. However, all SRBA recommendations, in consideration of source, will be made with respect to a permissible place of use.
2. According to Tony Olenichak, Hydrologist, WD01, the Moody Creek water rights have never been administered by WD01 because Moody Creek breaks in the lower reaches mid-summer and is not tributary to Teton River. Users of Moody Creek rights above the point where the stream breaks invoke the 'Futile Call Doctrine', distribute the available water accordingly and enjoy use of the available waters unregulated.
3. Claims filed by Woodmansee-Johnson Canal Co. reference the removal of the CFS/season of use restrictions, placed on the rights by the 1910 Rexburg Irrigation Co. vs Teton Irrigation Co. Decree, which state "to be reduced to (half as defined by award) after June 20th each year". This action is confirmed by Tony Olenichak, WD01.
4. 22-11259 combines decreed rights; 22-01, 02, 03 (omitted on claim), 04, 05, 06 and 596.
22-11260 combines decreed rights; 22-206, 236, 345, and 595.
5. According to a document submitted by Russell Wilding (see 22-594), W-JCC, 2.0 cfs of Moody Creek water is being delivered to K.M. Jeppesen at SENW Sec. 21, T5N, R41E. By GIS this serves some 537 +/- acres which is included in the claimed POU of 22-594, but no other W-JCC claims.

6. POU irrigated acres total some 2017 +/- acres, which includes the K.M. Jeppesen acres off Moody Creek. POU Boundary acres totals some 2389 +/- acres.
7. Peak diversion, from the record of 'Monthly Diversions' shows a Peak in June 1965 as 66 cfs. However, the record of daily diversion (table attached, from Water district 36 annual report) shows a peak diversion on June 26, 1965, of 61 cfs. But, obviously includes storage water since total Q of decreed rights only accounts for 59.8 cfs (of Teton River water). Diversion accounting (pg 34 of annual report) indicates the recorded peak is ONLY that of Teton River. No accounting for the Moody Creek deliveries.
8. All claims were recommended with the entire (large) POU for simplicity, per E. Carlsen, 11/15/05. Since Moody Creek serves both Jeppesen and the lower part of the main service area in the lower valley, but Teton River only serves the (all) lower main service area, it was decided that the entire Large POU would be recommended to all rights to avoid the confusion of detailing where individual rights/source would be served. Further, that the canal company would administer the rights as they always have.
