I. FINDINGS OF FACT

Notices of claim were filed for the above-captioned water rights pursuant to I.C. § 42-1409. The Director of the State of Idaho Department of Water Resources (IDWR) examined the water system for this reporting area. The *Director's Report* contained a recommendation or abstract for the elements of these water rights.

On April 21, 2006, the claimant of the water rights, the New Dry Creek Ditch Company, filed objections to the *Director's Report*, asserting that the number of irrigated acres should be 3104, rather than the 2709.5 as listed in the *Director's Report*. On August 1, 2007, the parties filed a *Standard Form 5 – Stipulated Elements of a Water Right* in each of the subcases, which resolved the objections by specifying a place of use of 2964 acres. The Idaho Department of Water Resources concurred with the stipulations.

II. CONCLUSIONS OF LAW

Therefore based on the file and record herein and pursuant to the *Standard Forms 5*, IT IS RECOMMENDED that water rights 63-00125K, 63-00126G, 63-00161L, 63-00205, 63-

00206, 63-00258B, 63-00263, 63-00286, 63-00288B, 63-28977, 63-31778, and 63-31806 be decreed with the elements as set forth in the attached *Recommendations for Partial Decrees Pursuant to I.R.C.P. 54(b)*.
