Hey, Al... Hope your Monday is going well.

I pulled file 22-7507 and this is what I found.

No field exam has been made on this one yet. I see proof was filed in 1990 but that was the last action taken on it. If you can get Roger to get someone to do the exam I'll try and get it finalized for you. I do have File 22-7418 on my desk to work on. That one is also in the name of Smith. The ownership of the place of use and the land swapping that they did with their neighbor makes it a tough one. I have done an initial review but need to send out a letter to Smith and Webster Brothers to get to the point I can license.

A draft license is usually created by the field examiner when he is writing up the exam. He then sends up the exam and supposedly all the work in GIS and computer is done and all I have to do is review and obtain any amendments that might be required. I wish it was that easy. Never seems to work out that way.

As far as an enlargement claim on a 1985 permit... I think you could process if it happened prior to commencement of SRBA but I can't remember the rules regarding enlargement claims. (Sorry my memory just ain't what it used to be...) I do remember that they can add land but no rate or volume. Be good if the examiner could check on the lands claimed under the enlargement while they are doing the exam of the 160 acres under the permit.

I am back to licensing full time now so hopefully will be able to get to all the licenses you guys want done. Kay

Yoooooooooooo Kay, I'm looking at 22-7507. Appears its a Draft License (Permit).... What exactly is a Draft License anyway? And, when is it going to become a Real License? Further, I have an Enlargement claim (filed 8/23/1988) on it.... can he do that?

have a good day..... al

Water Right No(s). A22-7075 + A22-7507
