MEMORANDUM TO ACCOMPANY BREAKDOWN:

The original Joyce Livestock Company controlled base lands during the priority years and for a period some 35 years before that time as are owned today (with the exception of the Bruneau ranch). This outfit has always operated from Murphy to Josephine with an area bounded on the north by the Snake River and on the west extending on to the Jordan Creek drainage and as far South as Josephine which was used always as a range for beef cattle on the east area around Triangle, Box T, Castle Creek, Bates Creek, Fossil Creek and at one time took in the range through Grandview to Bruneau. Used all of Sinker Creek.

The number of livestock operated during the priority period reached as high as 2100 or 2200 head. Of these several horses were grazed and by an Advisory Board ruling, any such livestock running outside for twelve months of the year, could claim no priority. Through various eliminations on numbers, the figure of 1822 head was agreed upon as those using the base at least four months out of every year and being dependent upon the Federal Range. One State School Section Lease, T 7 S - R 3 W - Section 16 was acquired by Henry Hatton and ruled as being dependent for twelve animal units leaving 1810 animal units for the Joyce outfit.

In 1936, James Nettleton was deeded a portion of the Joyce base properties which broke down to be commensurate for 198 animal units. This outfit grazes more on the Oreana side, Castle Creek and Box T. The remaining animal units on the Joyce outfit were rated at 1612. On the basis of this number, the transfer from the Bruneau Ranch was made under date of November 15, 1943 transferring 7325 AUMs of Federal Range demand to the deeded lands in the original outfit. This number of 1612 with the Federal Range demand has been used as a basis for the attached breakdown entitled "Summary after Bruneau Ranch Transfer".

At times through the years, the Joyce Livestock outfit acquired various properties intermingled with the land on which they operated. Some of these properties were dependent on the Federal Range and others were not. The above mentioned breakdown sets out all of these facts.

In order to definitely set up the base properties now owned by the Joyce Livestock Company and to consolidate their holdings into the most practical and economical type of operation, applications for three transfers were made to the Advisory Board at their regular meeting, September 28, 1951.

Upon allowance of these three transfers by the Advisory Board, Joyce Livestock Company would like to have the second breakdown (attached hereto) filed as a record in their case. This will completely set out all of the lands now owned with priority or without priority and the privileges affixed to each.

13. Joyce Livestock Co. is aware that the United States of America has filed claims for instream stockwater from the same source, subcases 55-11061, 55-11385, and 55-12452. Joyce Livestock Co. has filed timely objections to these three claims with the SRBA, on the basis that the rights claimed therein are in fact the same water rights claimed in this Amended Notice of Claim, and Joyce's original Notice of Claim to these water rights, and to which water rights the United States has no entitlement under the law. Joyce's objection to the United States claim is based upon the facts that the United States has never owned livestock which drank from the waters at issue, nor has the United States ever acquired the subject water rights from any actual appropriator or beneficial user, nor has any actual appropriator or beneficial user ever acted as the agent of the United States for the purpose of appropriating, perfecting, owning, or conveying the water rights claimed herein. The three listed United States claims are consolidated with the present subcases for trial in the SRBA.

Joyce Livestock is not aware of any other claimant to the stockwater rights asserted herein, or any other actual user of stockwater from the claimed source.

Most of the listed places of use are portions of the Silver City allotment, a federally administered grazing allotment in which the United States owns the underlying property interest. As to these places of use, Joyce Livestock Co., and its predecessors in interest, appropriated the stockwaters claimed herein while those places of use were part of the unreserved and unoccupied public domain, prior to the enactment of the Taylor Grazing Act in 1934. As a result, under Section 9 of the Mining Act of 1866, Joyce Livestock and its predecessors acquired vested stockwater rights under Idaho state law, and access rights under said provision of the Mining Act. Since the establishment of the federal grazing allotment and permit system, Joyce Livestock and its predecessors in interest have continuously held and used grazing permits for the places of use in question.

Three areas within the listed places of use are patented mining claims owned in fee by Joyce Livestock, located in portions of sections 7, and 8 of Township 5 South, Range 3 West, B. M.

The remaining places of use, located in Township 5 South, Range 3 West, Sections 17 (SW NW, NW SW, and SW SW), 18 (SE SE), and 19 (NE NE, and NW NE), are owned in fee by the heirs or transferees of Joseph Snell. This parcel was patented to Joseph Snell in 1939, after Joyce Livestock Co. and its predecessors in interest had already appropriated and perfected vested instream stockwater rights for the reach of Jordan Creek that passes through this parcel. To protect this prior appropriation of water rights, and in keeping with the usual practice and with statutory requirements, Snell's patent was issued subject to prior vested water rights and access rights of way. Joyce Livestock is informed and believes that since 1939 this parcel has never been fenced so as to prevent grazing by livestock owned by Joyce and its predecessors in interest, and that its owners have never objected to grazing use of said parcel by Joyce Livestock and its predecessors in interest. Thus, the claimed water right was not appropriated in trespass, but rather was appropriated and perfected prior to homestead entry by Mr. Snell; the property interest of Mr. Snell and his successors in interest is subject to the prior appropriation, as stated expressly on Mr. Snell's patent.
