

PART 1

6. General Information:

- a. Description of diversion system Buried collection system consolidates water into a 2 inch PVC pipe which conveys water to bottling site.

b. Are the lands from which you propose to transfer the water right subject to any liens, deeds of trust, mortgages, or contracts? _____ Yes ☒ No. If yes, provide a notarized statement from the holder of the lien, deed of trust, mortgage or contract agreeing to the proposed changes.

c. Describe the affect on the land now irrigated if the place of use is changed pursuant to this transfer:

Land is now in the Conservation Reserve Program. It will become dry-kind pasture and remain so after the program has terminated.

d. Remarks:

0.18 cfs in part 2b was reduced to 0.08 cfs in Part 1b because time of use is now lower per year and only 13.285 af can be utilized. This required rate to be lowered to 0.08 cfs for 250 days of usage, 8 hrs per day, so the change in nature of use did not exceed previous consumptive use.

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Transfer of Water Rights No. 22-2042

And said application is hereby APPROVED

subject to the following limitations and conditions:
1. A measuring device of a type approved by this Department shall be maintained as

part of the diverting works. 2. The maximum rate of diversion and maximum annual volume for commercial use under this right shall not exceed 0.08 cfs and 13.3 af,

respectively. 3. The maximum annual volume of water under this right for irrigation use shall not exceed 193.9 af. 4. Approval of this transfer in no way authorizes irrigation of more than 55.4 acres nor authorizes a diversion rate of more than .02

cfs per acre. 5. Use of water under this right is subject to control by the watermaster of State Water District No. 01, Snake River.

DEPARTMENT OF WATER RESOURCES
APPLICATION FOR TRANSFER OF WATER RIGHT
PART 3

- A. Draw a map or attach a USGS map indicating the new point(s) of diversion and/or the new place of use for rights described in part 1. Clearly depict the land by section, township and range number.

SCALE: 2 inches equal 1 mile. Draw plan in ink.

Page _____ of _____

Transfer No. _____

PART 3

B. CHANGES IN NATURE OF USE

1. Amount (cfs/ac-ft) 0.08 Hours/days/year 8 hr/250 days Period of Use Jan 1 to Dec 31
New Nature of Use Commercial to _____

2. Quantity and quality of return flows and location of discharge:

When plant is not operating the 0.08 cfs will be discharged back into Wrights Creek adjacent to bottling plant. Water will be of drinking quality.

3. Describe effects on other water uses resulting from the proposed change:

Irrigation right will be reduced by 0.18 cfs with a proportional reduction in irrigated acreage.

I hereby assert that no one will be injured by such change and that the change does not constitute an enlargement in use of the original right. The information contained in this application is true to the best of my knowledge.

I understand that any willful misrepresentations made in this application may result in voiding its approval.

Subscribed and sworn to before me this, 18th day of October, 19 89

Change in Nature of Use Analysis.

22-02042

Reducing license by 0.18 cfs.

$$\frac{0.18 \text{ cfs.}}{1.68 \text{ cfs.}} = \frac{x}{62 \text{ acres (listed on A22-02042)}}$$

$x = 6.6 \text{ acres.}$ need to be diverted in order to change nature of use for 0.18 cfs of right.

$$\frac{0.18 \text{ cfs.}}{1.68 \text{ cfs.}} = \frac{x}{124 \text{ AF/yr.} - \text{consumptive use on 62 acres, applying } 2 \text{ AF/yr/acre.}}$$

$x = 13.285 \text{ AF/yr.}$ that can be presumptively used.

$$13.285 \text{ AF/yr} \times 325,850 \frac{\text{gal}}{\text{AF}} = 4,329,145.3 \frac{\text{gal}}{\text{yr.}}$$

$$\frac{4,329,145.3 \frac{\text{gal}}{\text{yr.}}}{250 \frac{\text{days}}{\text{yr.}}} = 17,316.58 \frac{\text{gal}}{\text{day}}$$

$$\frac{430 \frac{\text{min.}}{\text{day}}}{448.8 \frac{\text{gal}}{\text{min.}}} = 36 \frac{\text{gal}}{\text{min.}} \quad * \frac{36 \frac{\text{gal}}{\text{min.}}}{\text{cfs.}} = 0.08 \text{ cfs.}$$

$$6.6 \text{ acres} \times 3 \text{ AF/yr/acre} = 19.8 \text{ AF/yr} \quad \text{volume diverted} < 13.285 \text{ AF to}$$

be diverted under change.

NOTE: Irrigated acreage in application is based on Notice of Claim A22-02042 and reflects the number of acres historically irrigated.

* At a rate of 0.08 cfs, 8 hrs/day for 250 work days a Consumptive use of 13.285 af will occur.
