

Claim no. A21-11972

Claimant Contact Log

Date 11-02-2006 Remarks Agent initials

I initially met with Dee Young, facilities mgr. (phone is 624-3462) at the Juvenile Corrections facility in St. Anthony. He assisted in defining the historic well irrigated ground.

Then Todd Pebbles, maintenance foreman showed me the well & pump facility.

Todd requested that we send our recommendation in care of him for accurate review.

Within the same building as the irrigation pump is the Potable well. This well has DEQ app tag # E0007017 + is accessible in the north door of the pump building.

Irrigation season can be charged to 4-1 to 10-31 but evidence in Attachment 2 does not give the quantity^{Practical} of the well.

.48 cfs is 1" to the acre based on 24 acres.
