Clerk of the District Court
Snake River Basin Adjudication
253 Third Avenue North
PO Box 2707
Twin Falls, ID 83303-2707

Ref.: ~~24-4064~~
24-4068 B

Sir:

I have enclosed Standard Form 4 and an Amended Notice of Claim for these two water rights. The use of the original water right to show the amendments was a little confusing to me so I am summarizing the issues here.

24-4064	Quantity	Priority Date
	Original 2.8	Original 6/1/19
	Adjudication .32	Adjudication 2/7/27
	Requested .48	Requested 6/10/16

24-4068B	Quantity	Priority Date
	Original .77	Original 8/28/13
	Adjudication .59	Adjudication 2/7/27
	Requested .9	Requested 6/10/16

I have also enclosed all of the documentation available. Two Documents (Affidavit of Harvey Kennington and affidavit of Verl Smedley) were in the IDWR file but are no longer there.

Thank you for your attention to this matter.

Sincerely

Peter Riede

INSTRUCTIONS

This form is used to file a late Notice of Claim or an amendment to a Notice of Claim in a reporting area where the Director's Report has been filed. Forms may be obtained from the SRBA Court, the Idaho Department of Water Resources (IDWR), or you may copy or reproduce this blank form. If you copy or reproduce this form, please copy on both sides with the even-number pages upside down.

The water right number for your late or amended claim must be indicated above in the blank space following "Subcase." You must use a **separate form for each** late or amended Notice of Claim.

This form has been adopted by the court in ***SRBA Administrative Order 1, Rules of Procedure*** (amended Sept. 30, 1996), Section 4, which may be consulted for further information.

By filing a *Motion to File a Late Notice of Claim* or a *Motion to File an Amended Notice of Claim*, you certify that it is well-grounded in fact; is warranted by existing law or a good-faith argument for the extension, modification or reversal of existing law; and is not filed for any improper purpose, such as to harass, cause unnecessary delay, or needlessly increase the cost of litigation.

☒ I have read **SRBA Administrative Order 1, Rules of Procedure** (amended Sept. 30, 1996).

My name is PETER RIEDE

My address is 95 STARWEST PO Box 220
AFTON, WY 83110

My phone number is: Work — Home (307) 886-9086

I am an attorney representing _____

My name is _____

My address is _____

My phone number is _____

MOTION TO FILE A LATE NOTICE OF CLAIM

A Motion to File a Late Notice of Claim will require a hearing before the Presiding Judge.

☐ I did not file a Notice of claim to the use of water in the SRBA because:

☐ I filed a Notice of Claim and elected to defer judicial proceedings on my domestic or stock watering use. I desire to reinstate my Notice of Claim for domestic or stock watering use.

☐ I am providing legal and factual documentation for my claimed use of water. You must describe these documents and attach a readable copy. (You do not need to fill this out if you are reinstating a Notice of Claim for domestic or stock watering use, but you **must** attach a copy of your Notice of Claim.)

I have attached:

- ☐ A fully completed Notice of Claim (available from IDWR).
- ☐ A claim filing fee for a domestic and stock watering use. IDWR may charge this fee pursuant to I.C. § 42-1414. To determine this amount, contact IDWR at (800) 451-4129. I have enclosed a check payable to: State of Idaho Department of Water Resources in the amount of \$ _____.
- ☐ A claim filing fee and a late claim fee for those claims other than a domestic or stock watering use for which a notice of claim was not filed. To determine this amount, contact IDWR at (800) 451-4129. I have enclosed a check payable to: State of Idaho Department of Water Resources in the amount of \$ _____.

Follow these instructions regarding the hearing on this motion.

1. Contact the Clerk of the SRBA Court (208-736-3011) to request a hearing date and time.
2. Fill in the following information:

This motion will be heard on _____
(Insert Date and Time)
at the SRBA courthouse, 253 Third Avenue North, Twin Falls, Idaho.

MOTION TO FILE AN AMENDED NOTICE OF CLAIM

A *Motion to File an Amended Notice of Claim* may require a hearing before the Presiding Judge or Special Master or may be granted by leave of the court or by written consent of the parties and the Idaho Department of Water Resources. Leave to amend a claim shall be freely given when justice so requires.

☒ I must amend my Notice of Claim to the use of water in the SRBA because:

IN CORRECT ADJUDICATION ① PRIORITY DATE
② FLOW RATE

- ☒ I am providing legal and factual documentation to support my amended Notice of Claim. You must describe these documents and attach a readable copy.

AFFIDAVIT OF ROBERT + LESLIE NATE

AFFIDAVIT of Robert Leslie Nate, Trustee of The Testamentary Trust of
Albert Leslie Nate

STATE OF IDAHO)
 ss
COUNTY OF BINGAM)

Robert Leslie Nate, being first duly sworn, deposes and says:

TO: State of Idaho
Department of Water Resources
900 N. Skyline Drive
Idaho Falls, ID 83402-1718

SUBJECT: Evidence, Proof and Support of water right priority dates per
your request 9/14/94, concerning the Albert Leslie Nate, Test-
amentary Trust property in Caribou County, ID NO's A24-04064,
A24-04062, A24-04063, A24-04068B and A24-04069.

ATTACHED DATA AND SUPPORTING INFORMATION:

1. Map showing original homesteads in the area and patent dates, pro-
vided by and from records in the Caribou County Courthouse at Soda
Springs, ID.
2. Aerial map of the area on which I have sketched in the property of
the Testamentary Trust of Albert Leslie Nate, plus other notes re-
garding the flood irrigation systems. Map was in my files from the
settlement of the Leslie Nate Estate. I was the administrator of
this estate.
3. Copy of the patent issued by the Registrar of the Blackfoot, Idaho
Land Office to A. Leslie Nate for his homestead and signed by
Herbert Hoover 11/28/32. Also includes a receipt for his homestead
application dated 2/7/27.
4. Copy of documents transferring the Leslie Nate homestead properties
to the Testamentary Trust of Albert Leslie Nate.
5. Affidavit from Harvey Kennington, presently 88 years old. Early
homesteader and still owns ranch in the area. Familiar with the
now present Leslie Nate Trust properties.
6. Affidavit from Verl Smedley, his father, Edward Smedley, worked on
the ranch from 1918 to 1928.

My Grandfather, Charles C. Nate, who died in the late 50's, was an
early pioneer rancher in the area. My father, Albert Leslie Nate, born
in 1903 worked with my grandfather on the ranching complex until his
death in November 1982. I also worked on the ranch until I was 32 years
old and continued to do so directly and indirectly until the present
time. I was born April 8, 1928.

My grandfather and father told me of grazing cattle in the area of
the referenced water rights even before homesteading occurred. The
water was and is still being used to flood irrigate the natural meadow
and graze cattle.

The attached map procured from the Caribou County Courthouse in Soda Springs, ID indicates that Seth B. Nield was the first homesteader of 80 acres between 80 acres and 320 acres homesteaded by my father, Leslie Nate. The Seth B. Nield homestead was patented 12/13/05. My father received a patent on his homestead 11/28/32. (See copy of original deed and the receipt of fees dated 2/7/27 issued by the U.S. Land office in Blackfoot, ID).

Other homesteaders on the adjoining property was homesteaded as early as 1909. These adjoining properties became the Books Ranch and then was procured by my grandfather in the early 1900's and became the Charles C. Nate Ranch until his death and is now owned by Ferris Nate. One exception is the 80 acres mentioned previus as being between hte two parcels homesteaded by my father. After his death it became the property of the present Albert Leslie Nate Testamentary Trust.

In the early 1900's, the homesteaders, my grandfather, and father grazed and watered livestock on the properties. To improve the growth of the natural meadow they built ditches and flood irrigated the meadow with the water prior to it entering back into Crow Creek. This was necessary not only to provide better grazing for their own livestock but to provide pasture in the summer and some hay in the winter for the freighters who started freighting supplies back and forth from Star Valley to Montpelier along the Crow Creek Road as early as 1895 and continued to do so well into the 1920's. (Ref. "Treasured Tidbits of Time", copyright 1977).

The ditches and flood irrigation systems have been in existance as far back as I can remember as small child at age 4 or 5, when I accompanied my father and grandfather to these ranch properties. At times we stayed in my father's old homestead cabin, the remains of which are still there today. I was also there and remember the daming of the Books Spring in 1955 and extending the ditch to water additional acreage on my father's homestead.

The purpose of the forgoing discertation is to establish the early history of the early building of ditches and need for the improvement of grazing on the properties by the early pioneers including my grandfather and father who talked to me and told me the detail and early history of the properties including the flood irrigating of the property. This is also addressed on the enclosed affidavits submitted by Harvey Kennington of Fairview, WY and Verl Smedley of Cheyenne, WY, whose father, Edward Smedley, worked and lived on the properties in the summer time from 1918 to 1928. Edward also worked on the ranch complex intermittently for my grandfather and father the rest of his life.

SUMMARY: Water Rights of The Testamentary Trust of Albert Leslie Nate
Caribou County, ID

Water Right No: A24-04062
Water Source: Books Spring
Priority Date: 6/1/55

NOV 07 1956

Books Spring is also known as the Big Spring, Bull Head Spring, and Cozzin Spring. I remember the construction of a dam and extension of a ditch in 1955 to flood irrigate the property origionally homesteaded by Leslie Nate, (11/28/32). See attached patent document as recorded. The purpose was to improve growth of the natural grasses

and provide stock water for summer grazing of cattle. This flood irrigation system is in use today and cattle are presently being pastured on the property.

Water Right No: A24-04069
Water Source Books Spring
Priority Date: 8/28/13

Property homesteaded by Seth B. Nield and patented 2/13/05. Also known as the John Cozzin's homestead and or ranch. Remains of homestead cabin are still evident. Water from the spring was diverted by these early settlers for flood irrigation. Reference is made to this property in attached affidavits from Harvey Kennington and Verl Smedley. The property was procured by Charles Nate in the early 1900's and on 2/12/86 deeded to the Leslie Nate Trust. Based on conversation with my grandfather and father, from the time I was young, and being involved with the ranch all my life, I firmly believe that the history and priority date is correct. The flood irrigation system is still in use and cattle are grazed on the property. The old system was improved when a dam was constructed in 1955.

Water Right No's: A24-04064 & A24-04068B
Water Source: Books Creek, Worm Creek and Crow Creek
Priority Dates: 6/1/19 8/28/13

The early homesteaders as shown on the attached map and my grandfather when he procured the adjoining property in the early 1900's including the 80 acres which now belongs to the Leslie Nate Trust built the ditch as shown on the aerial photo. The purpose was to divert water from Books Creek and Worm Creek and supplement these streams by diverting additional water from Crow Creek to improve irrigation on the natural meadow, therefore improving grazing for their livestock.

My grandfather and father were grazing cattle on the area even before people began taking up homesteads. They often told me of the trouble they had with wolves preying on and killing the cattle.

The ditch is also referred to in the attached affidavits. Based on my knowledge of the area, discussion with early pioneers, including my grandfather and father I believe the priority dates and the additional information recorded in your office is valid and correct concerning these water rights.

Water Right No: A24-04063
Water Source: Waste Water
Priority Date: 6/1/29

The wastewater is a result of flood irrigation of adjacent property owned by Charles Nate. Water accumulated on the westside of the road was directed underneath the road and a ditch built to distribute it across what was known and used for a horse pasture before the water entered Crow Creek.

NOV 07 1930
The affidavit of Verl Smedley indicates that this water distribution system could have been in place before the 6/1/29 priority date. This system is presently being used and provides water for flood irrigation as indicated in your record. Cattle and horses are pastured in the area at the present time.

I also believe the Priority date of 6/1/29 is a valid and correct date for reasons stated and my personal knowledge of the area. The priority date of water being put to beneficial use could have been even earlier.

I firmly believe that all priority dates and data you have on record concerning the properties of the Testamentary Trust of Albert Leslie Nate are accurate and valid based on the previous discussion and the attached information.

I was with my father in your office when he provided the priority dates and information to file on the water rights 3/3/82. At that time he had access to the old records of his father, Charles Nate. He also had homesteaded property and had ranched in the area all his life. I firmly believe all priority dates and information provided by him are accurate and valid and based on his personal knowledge as well as existing records. Harold Nate, dad's brother, provided the priority date and information for water right no. A24-04069 when it was filed 2/14/83. He also had access to the old records and a lifetime of knowledge of the area and I firmly believe the priority date and additional data on your records to be valid and accurate.

The old records kept by my grandfather since the early days were primarily in the hands of dad's brothers, Charles Russell and Harold Nate. It is unfortunate but after their deaths the records were either misplaced or discarded by their children and not passed on to me or other still living members of the family.

I am continuing my search for additional information and will forward any information to your office. If you need any further information or clarification let me know.

(SEAL)

Field Exam Narrative, A24-04064 and A24-04068B
30 July 2005, B. Contor

These two water rights are for irrigation on the south side of Crow Creek, with water supply from Crow Creek, Warm Creek, and Books Creek. The Crow Creek diversion is the furthest upstream and intercepts the other two creeks as it proceeds downstream. This ditch and these three diversions are shared with neighbor Fred Nate, A24-04068A. The Crow Creek diversion is also shared with Alleman, claim A24-10026.

Full contact log and sketch map is contained in A24-04062. All photos for A24-04064 and A24-04068B are in A24-04064 paper file.

1. Priority.

Per Fred Nate, historical practice since the property was divided has been to share the water right on a 1/3 (A24-04064 and A24-04068B) - 2/3 (A24-04068A) rotation. Riede acknowledges this practice since his arrival. To preserve this practice it will be important to recommend A24-04068A and A24-04068B with identical priority dates based on the evidence in both files.

2. Place of Use.

Shapefiles A24-04064.shp and A24-04068B.shp show the place of used based on field inspection, GIS viewing of 1987 aerial photos, and GPS waypoint 3 which marks the point shown to me by Riedes as the furthest extent of lands irrigated from the ditch from Crow Creek/Warm Creek/Books Creek. The apparently wet lands beyond this waypoint are naturally wet from springs and are not irrigated.

GIS shows 18.8 acres of irrigation under A24-04064 and 32.4 acres under A24-04068B. However, claim A24-04068B is only for 30 acres, and there is 2.6 acres of overlap in SWSW of section 1, claimed under both claims. Total irrigated area is 48.6 acres, claims sum to 53 acres.

One solution would be to recommend only A24-04064 in SWSW, freeing up enough acres for the lands claimed only A24-04068B. Another would be to prepare an amended claim for additional acres. I have taken no action either way.

3. Points of Diversion.

Crow Creek diversion, waypoint 4, 2733032E 1266119N IDTM83. No site tag. This is shared between A24-04064 (Riede), A24-04068B (Riede), A24-04068A (Nate) and A24-10026 (Alleman).

Warm Creek diversion, waypoint 10, 2733876E 1267019N IDTM 83. No site tag. The ditch from Crow Creek intercepts the entire flow of Warm Creek. This POD serves A24-04064 and A24-04068B (Riede) as well as A24-04068A (Nate).

Books Creek diversion, waypoint 11, 2734119E 1267320N IDTM83. No site tag. The entire flow of Books Creek is spread out on a grassy area uphill of the Crow Creek ditch. While there is no physical connection between the Books Creek ditch and the Crow Creek ditch, Fred Nate states that at times tailwater from Books Creek accumulates in the Crow Creek ditch and is conveyed onto Riede property when it is Riede's turn in rotation.

4. Quantity.

Books Creek and Warm Creek are very small streams entirely intercepted by the ditch. The diversion at Crow Creek supplies a ditch that was running 8 feet wide, 1.9 feet deep, with a floating stick traveling 10 steps (approx. 28 feet) in 25 seconds. This appears to be adequate capacity to serve all the rights claimed from this POD.
