Recommendation:

Basin 34's current Irrigation Season of Use = 3.5 af/acre (per Craig Saxton, used this amount, and then set a combined limit for 34-2350 and 34-2418)

Recommend 1.18 cfs (remaining on the license, since 34-2350 claimed 1.60 cfs, and 280.0 af)

Recommend 245.0 af (per Craig Saxton, use 3.5 af/acre, with current Season of Use standards)

F05 34-2350 is also diverted through POD described above.

F01 Water is delivered through Burnett Ditch (Per Carter Fritschle, only list point of injection and point of reinjection in comments, since the Burnett Ditch is only a way of getting the water to the POU, we do not have authority over the ditch. Do not show them as separate PODs.)

C18 partial decree

E60 combined limits for 34-2418 and 34-2350 (cfs & af)

E01 use of this right combined with water from Big Lost River Irrigation.

K06 WR limited to 70 acres.
