MOTION TO FILE A LATE NOTICE OF CLAIM

A *Motion to File a Late Notice of Claim* will require a hearing before the Presiding Judge.

☒ I did not file a Notice of claim to the use of water in the SRBA because:

The water springs up on or adjacent to our property and has been utilized for irrigation and stock water since I first saw this property. I was lead to believe that I had water rights with this land when I bought the property and did not realize that I had to file further claims to retain these historic rights.

☐ I filed a Notice of Claim and elected to defer judicial proceedings on my domestic or stock watering use. I desire to reinstate my Notice of Claim for domestic or stock watering use.

☒ I am providing legal and factual documentation for my claimed use of water. You must describe these documents and attach a readable copy. (You do not need to fill this out if you are reinstating a Notice of Claim for domestic or stock watering use, but you **must** attach a copy of your Notice of Claim.)

Following is a brief abstract taken from Teton County court House records by AW Engineering.

This history supports the claims and information that water diversion and irrigation systems were developed on the ranch located in Sections 3 and 4 of Twp 4 N, Rng 45 E, Teton County, Idaho.

DATE	OWNER
NE 1/4 Section 4	
1902	Homestead from USA Government Patent
9/26/13	Leanard Covart
1/2/14	Herber Sharp
July 1922	Teton Livestock Co (Herber Sharp)
May 1933	Leo Grover
June 1939	EH Martin

1902	Homestead from USA Government Patent
7/19/15	DM Fairbanks
May 1932	JB Fairbanks
June 1938	JR Harper
12/8/1939	EH Martin

Local knowledge and information shows that the ranch was developed into a cattle ranch during the period of 1914 1915 through 1922 when it was sold or transferred to Teton Livestock Co.

We are hereby claiming a water rights priority date of 1922 for the ranch water rights.

From Jay Calderwood
904 S 50 West Victor, Idaho 83455

I worked for Ralph Martin on the Rafter J Ranch located in Sections 3 and 4, Twp 4 N, Rng 45 E, Teton County, Idaho during the summers from 1955 through 1957.

My responsibilities included irrigating the meadows on the ranch. The upper hay meadow always had an abundance of water to fill the ditch. There was enough water to irrigate the upper meadow and run water down the slough to irrigate the lower meadow at the same time. We always had more water than needed so we ran the water on through the ranch to the neighbors land.

I remember this well because of the good horse I rode to drag dams & irrigate on.

I also worked on this ranch for Ralph Martin after I was married during 1960 and park of 1961. The irrigation system was operating in the same manner as it was during 1955.

From knowledge and information that I have I would agree that irrigation and stock water priority dates for this ranch would be some where between 1915 and 1940. My best estimate of date irrigation and stock water rights were established in 19 ~~22~~ 22

Dear Sirs:

I have been asked to write my recollections of water delivery out of Teton Creek for land that has been irrigated from springs and is located southwest of Driggs.

Early each spring water was delivered from Teton Creek through ditches to ground east and west of State Highway 33 for flood irrigation. Once this water was used it would take 7-10 days for the springs just south and southwest of Driggs to come in. This land is currently owned by Pices, Westons, Henries, and others.

If this water isn't diverted from Teton Creek and used in this area, the springs and sub-water won't come in. That has been my experience during the time I was watermaster (1978-2000).

Sincerely,
Lee O'Brien
