Figure 1: Schematic representation of the experimental design. The diagram shows a sequence of events for two groups: 'Control' and 'Experimental'. The 'Control' group starts with 'Baseline', followed by 'Pretest', 'Training', 'Posttest', and 'Follow-up'. The 'Experimental' group starts with 'Baseline', followed by 'Pretest', 'Training', 'Posttest', and 'Follow-up'. The 'Training' phase for the 'Experimental' group is marked with a red 'X' and a red arrow pointing to the 'Posttest' phase. The 'Follow-up' phase for the 'Experimental' group is marked with a red 'X' and a red arrow pointing to the 'Posttest' phase.

The diagram illustrates the experimental setup. A participant is seated at a table, looking at a screen. The screen displays a sequence of stimuli: a fixation cross, a target stimulus, and a response button. The participant's response is recorded. The diagram shows the flow of information from the participant to the screen and back to the response button.

Figure 1 consists of two parts, (a) and (b), illustrating a 1D chain of particles. Part (a) shows a horizontal line representing the chain, with particles represented by small circles. The positions of the particles are labeled $x_1, x_2, \dots, x_N$ from left to right. Part (b) shows a similar chain, but with a dashed line indicating a boundary or interface between the particles and the right side of the chain.
