Re: Grand View Mutual Canal Company
SRBA Claims 02-00080 and 02-00081

Dear Jan:

Thank you for making it possible for me to review the investigative files for the Snake River Basin Adjudication (SRBA) claims (A02-00080 and A02-00081) filed by the Grand View Mutual Canal Company. I reviewed the information with Frances Field and with her son Howard Field to confirm that the acres for the Fields' Home Place were included in both the claims by the Grand View Mutual Canal Company and the subsequent investigation by the Idaho Department of Water Resources (IDWR). There is a small portion in the SENE of Section 1, T05S, R02E, at the Home Place which is not listed in the place of use. Howard Field will work with the Grand View Mutual Canal Company office regarding this acreage.

The IDWR investigative files for these two SRBA claims leave open the question of how the 1947 and 1952 claimed priority dates will be assigned to lands within the service area of the Grand View Mutual Canal Company. Since both claims are based on beneficial use, the Fields are interested in knowing how lands will be identified as being irrigated in 1947 and which lands will be identified for the 1952 priority date.

Please let us know when IDWR begins its review of the Grand View Mutual Canal Company claims and the issue of the priority dates within the irrigated lands under the canal system.

Sincerely,

BEEMAN & HOFSTETTER, P.C.

ELMORE IRRIGATION COMPANY

Carey Act Number:	50
Location:	Elmore County
Acres Segregated:	Applied for 6,249.83
Acres Patented:	None
Estimated Cost:	None
Final Cost:	None
Comments:	The same as the Mountain Home Project

This was not a separate and distinct project. The Elmore Irrigation Company was the construction company on the Mountain Home Project. The Mountain Home Project will be covered later in the report.

GRAND CANYON PROJECT

Carey Act Number:	51
Location:	Bonneville County
Acres Segregated:	Not granted
Acres Patented:	None
Estimated Cost:	Not available
Final Cost:	None
Comments:	Project never started

There are no records available in the Carey Act files on this project. Apparently a proposal was made and a request for a segregation. The application for segregation was not granted.

Location: (See Figure 5)	Owyhee County
Acres Segregated:	Contracted 840 acres of the 78,446.70 acres in segregation list 21
Acres Patented:	40.00
Estimated Cost:	\$150,000.00
Final Cost:	\$45,000.00
Comments:	Only project to reclaim land in the Little Bruneau segregation

The area in this project was originally set aside under segregation list number 21 which totalled almost 80,000 acres for the Bruneau (Little) Project. When this proposal was made by the Grand View Land and Irrigation Company the Bruneau (Little) Project was defunct. The first proposal was to irrigate 1,200.00 acres of land located along the Bruneau River. The state approved the proposal but reduced the acreage to 840 acres.

A contract between the State of Idaho and the company was entered into in 1920 and construction started; however, the company was soon in severe

SUBJECT:

In light of the 4/14/82 memo to the Idaho Power Canal Agreements file the canal loss has been reduced to 21%. This reduces the amount of water for the second right. The total diversion under both rights is then 2,693 miners inches plus 21% canal loss.

Nothing was found by the investigation of these water rights that would substantiate ~~the~~ *by the deviate* from those that were claimed. The priority dates seemed legitimate in light of the lapsed permit and the Bruneau River decree both of which were reviewed. The season of use is limited by the 1952 Power Co. agreement.

The amount of water for each of the rights was limited by the extent of beneficial use, number of irrigated acres. The Company claimed over 3,000 acres but this number included every acre of ground between the canal and the Grand View Irrigation District Canal. No reductions were taken for roads or waste areas by the claimant. This fact is known because the adjudication staff assisted the claimants in filing and calculating the number of "irrigated" acres. The diversion rate corresponds to the duty of water for this number of acres plus the conveyance loss in the canal.

Various calculations were made to determine the conveyance loss for the company as accurately as possible. These calculations appear on computer printouts in the Idaho Power Canal agreements file. The delivery of the Mutual's water from C. J. Strike reservoir is complicated by small deliveries in unequalled distances along the canal before the Mutual's lands. Most of these smaller rights are for less than an inch per acre and are measured at the dam where there is no room for conveyance loss for those rights. This amount of water is added into the water that Mutual appropriates and therefore influences the conveyance loss of Mutual. For calculation purposes the assumption was made that all of the rights were delivered at one inch per acre at the canal tap to those lands. With this assumption a conveyance loss of 21% was determined. Backing this out of the other rights meant that the Mutual's loss would therefore be 25.1%. This figure was used in determining the water right for each of Mutual's two water rights.

The number of irrigated acres recommended corresponds very closely to the 2,670 acres filed for each of the three lapsed permits. The 1947 appropriation was measured on 5/13/1952 at 49.49 cfs. This amount is recommended for the 1947 right. The additional appropriation of the remaining one inch per acre plus conveyance loss is recommended under the second water right. The priority date for the second water right needs further investigation. The claimant stated a 4/1/1952 priority date and yet the engineer on 5/13/1952 measured the 49.49 cfs. The additional water must have been appropriated at a later date. The diversion rates at the Idaho Power Canal are measured weekly by the Power Company's staff. The records of the Power Company were reviewed for verification of the Mutual's diversion.
