Re: SRBA Subcase Nos. 27-2075; 27-2069
B & H Matter No. 5354

Gentlemen:

Dennis Lake called to advise that the measured water flow off of the water source for right to 27-2069 was 2.1cfs.

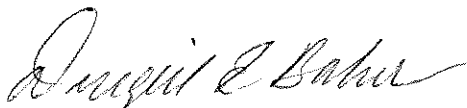

Assuming the water is diverted, and assuming a maximum utilization of .02cfs, I assume that at least 105 acres would be irrigated. Obviously, if because of the conditions of the land more land is irrigated, the acreage may be larger.

Please advise as to how we might be able to move this matter along for final resolution, assuming Mr. Lake agrees that he will not seek any change of place of use for the water right.

We look forward to your response.

Very truly yours,

BAKER & HARRIS

Dwight E. Baker
