RE: Snake River Basin Adjudication (SRBA)
Claim Numbers: A72-00201A, -00201E, -00201H, -00202A, -00202D,
-00202E, -00202F, -00202G

Dear Mr. and Mrs. Baker:

This letter is in response to your Notice of Error replies on the above mentioned claims. I hope that I may satisfactorily explain some of my determinations in a way that doesn't just cause us all more confusion.

I was concerned, first off, by your questions regarding stockwater as an element of Use on claim numbers **72-00210H, -00202D, -00202E, -00202F and -00202G**, because it shows up on my copy. I am enclosing computer copies of the recommendations for each of those claims, in case there was an error on the ones sent to you earlier. On claims **72-00201A, -00201E, and -00202D**, stockwater was not originally claimed as a Use, but listed as incidental stockwater on the claim. This remark is included in explanatory material on claim 72-00201E, but not on the other two. As a general provision, incidental de minimus stockwater is included in any irrigation right, but if still wish to add it to your claims, they will have to be amended. Let me know if you wish to do so, in the meantime, I will add the explanatory remark concerning stockwater to claim numbers 72-00201A and -00202A.

You commented on several of the claims because the recommended acres had been decreased from the amount originally claimed. A general explanation is that I can only recommend acres that are actually being irrigated. Given the geography of the Pine Creek area, that excludes any gravel banks or marshy areas that sub up from the river, and the hillside that bisects some of the lots. The Adjudication was begun, in part, to assess the amount of water and number of acres being irrigated at the time of its commencement in 1987. It has been Department policy to allow the recommendation of acres that were dry in 1987 but on which there has been a resumption of irrigation, provided the land was historically irrigated, and no injury to other water users is apparent. I can not, however, recommend acres that you may wish to irrigate in the future.

The acres I recommended, as outlined in yellow on the GIS image, were calculated by a computer program known as Arc View. This program is much more accurate than past methods used to determine area. The basis for the image is aerial photography taken in 1987 or 1988 to record a snapshot in

time, if you will, of irrigation practices at that time. If you feel that I have excluded areas that you do actively irrigate, please mark them on the GIS image and return it to me for further discussion.

The 1938 Court Decree that all of your claims are based upon intended to award 1½ inches (or .03cfs) of water per acre of irrigated land, and that is the guideline I used to determine the recommended diversion amount for the different lots Pine Creek Subdivision. The decrease in diversion rates you noted are the result of the decrease in the acres I found irrigated.

On your replies for claims **72-00201A** and **-00201E**, you note that there should be an additional point of diversion from Pine Creek. I cannot add an element without your amending the claim, so find enclosed amended claims for you to sign and return to me. I hope that the general explanations above cover your comments regarding stockwater and diversion rate.

Concerning **A72-00201H**, the diversion rate was adjusted down to reflect the actual irrigated acres, and also because the 0.02 cfs allowed for stockwater is included in the water decreed for irrigation. Even though the 1938 decree did not include stockwater, stockwater can be added as a use if it is used within the irrigation season and does not increase the decreed diversion amount for irrigation. This explanation applies to all your rights that have stockwater listed as a purpose of Use.

I hope that this letter has explained my methods, somewhat. Please review things again and get back to me with specific changes you have. It would be best to draw them on the GIS image, but if you would rather call, we can possibly hash things out over the phone, with the papers in front of us. Be aware that the amended claim forms I am enclosing for your signature represent the base claims as you filed them, without my preliminary changes for recommendation. If you have any questions, please don't hesitate to call me. We appreciate your continued attention to the SRBA.

Sincerely,

Vikie Hancock

1. Describe the portion of the proposed recommendation with which you disagree (e.g. priority date, period of use, source): (1) Purpose of Use states Irrigation. This should read Irrigation and Stockwater. Doesn't show stockwater on preliminary, it does on our original and has been determined for historical beneficial use. (2) Quantity-The CFS for this right has been decreased from 0.52 to 0.27. The CFS should remain at 0.52 (3) Place of Use is down as 9.1 acres and was 18 acres. The original 18 acres should prevail.
2. Describe the changes you wish to make in the proposed recommendation:
(1) Purpose of Use: Should state Irrigation and Stock water-add stockwater as in the original-historical beneficial use right.
(2) Quantity-Leave as decreed, 0.52 CFS (3) Place of Use-Leave acreage at 18 acres
3. Give a brief explanation as to why you disagree with these portions of the preliminary. It was proven as historical beneficial use and still can. (2) Leave as in the original of 0.52 CFS (3) Water may not be on every acre at this time, but we may find a need in the future to irrigate more ground either through better equipment, need, more efficient use of water, drain water, etc. We paid for this right and should not have it taken away. We question the accuracy of your measurements, also

 I AGREE with this proposed recommendation; no changes need to be made.

F. RATE/VOLUME CALCULATIONS: (IRRIGATION)

1a. IRRIGATION RATE 1b. CALCULATIONS
ACRES x 0.02 CFS/ACRE = CFS
(Taken from pou review)

IS A DIVERSION RATE PER ACRE GREATER THAN 0.02 CFS/ACRE CLAIMED? Y() N()
IF YES, IS AN ADDITIONAL WATER USE FORM FILED AND ATTACHED? Y() N()

2. IRRIGATION DIVERSION VOLUME

CLAIMED DIVERSION VOLUME = AF/A

ACRES x DIVERSION VOL. AF/A FOR AREA =

TOTAL DIVERSION VOLUME AF/A

3. IRRIGATION CONSUMPTIVE USE

CLAIMED CONSUMPTIVE USE = AF/A

ACRES x CONSUMPTIVE VOL. AF/A FOR AREA =

TOTAL CONSUMPTIVE USE AF/A

4. CALCULATIONS FOR USES OTHER THAN IRRIGATION: SEE BELOW () OR SEE ATTACHMENT ()
