To Whom It May Concern:

Enclosed are my two Notice of Error Replies for Water Right Numbers 75-10400 and 75-10392. Attached to these are the preliminary recommendations I received, on which I indicated in red the corrections/additions. Also attached are the copies of the aerial photos on which I indicated in orange the corrections/additions. I crossed out the yellow dots and yellow polygons since they were not in the correct locations.

I was not able to make the trip to Idaho this week to attend the meeting in Salmon. I had commitments with my work here in Tucson, Arizona. However, on September 24, 2005, I did make a special trip to Idaho to meet with Jack Ellis on my property. We walked the ditches and acreage and located the springs and diversions with a GPS system. Jack was very good to work with and I very much appreciate his help. Unfortunately the GPS must not have been working correctly since those GPS points, although close, are not in the correct locations on the aerial photo. I indicated in orange on the copies of the aerial photos the correct locations as best I could.

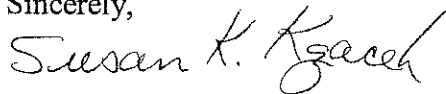

The availability of the copy of the aerial photos and the indication of the sections and quarter sections was very helpful in locating and describing more accurately the legal description of the points of diversions and place of use. Previously these copies were not available and for that reason it was not until I had these that I was able to accurately make these descriptions. Thank you for providing the copies.

I also want to recognize that Robert Foster has been extremely helpful every time I have called him with questions.

I am hoping that you can make the corrections/additions that I have indicated without any problems. If you need to reach me, my cell phone number is 520-979-9100.

Thank you for this opportunity.

Sincerely,

Susan K. Kozacek
