WESTERN REGION

DEAR CARTER

Sorry to be so long getting information
on Carver Creek back to you

Billy Walters was on Christmas
vacation, but when I finally got
him on phone, He said the north
& South he mentioned was North of Carver
Creek & South of Carver Creek, not
thinking of using hiway. But if you
still would like another letter he would
write it if you let him or I let
him know.

His phone # is 541 490 0350

Also I am sending Photo map of Carver
Creek Points of Diversion & Locations
to be watered, I hope this clears
up things if not let me know

Phone 208 628 3712 6283704

There is lots of water in Carver Creek
A very steady flow Summer & winter
the flat across the Hiway uses only
A 2" pipe There is excess water year around

Thank you Sincerely

Jim Rust

P.S. I will call you after you have received
this letter
THANKS Jim

WATER RESOURCES
WESTERN REGION

Dear Carter

I'd like to mention my views on the past protests to our having water rights on Carver Creek 1st we have the largest flat to be watered & also Residential site compared to at least right now 1 Residential home in existence & we have had no problems with this owner CARL IRMINER

The Jack Gruel is a different story we got along with Jack until we put a trailer house in across highway from him & he thought we weren't fancy enough for him so I understand his exception except the wooden flume he was talking about was not what was being used that was in years past & for his side of road not ours we have always used a pipe & ditch he didn't seem to know about and he was wrong in saying water wasn't used or diverted from Carver Creek because it has been. As far as Grace & Edmund Nicholas they are now deceased & I have no idea why they would protest, we always got along with them very good ~~the~~ visited them we thought they were good ~~neighbors~~ neighbors. That is the place CARL IRMINER now lives in AND the Geraldine & Michael McCays never have owned or lived near here (over)
