To whom it may concern

In 1950, I was buying and forming the acreage north of the five lots I now own (as of 1960) at that time there was a ditch running through the property the Bielby now own, and across the road ~~into~~ East. When I bought the five lots, there was water running through the Bielby property and across the road east to my property. I filed water right for that water April 1, 1961 when I first used it to water the lawn & trees on my property and I have used the water since that time Stanley Morgan
