Location of POD/POU: Accomplished Change of POD and Accomplished Change of POU (license was written wrong and was never corrected/amended). POD/POU have never changed; they've always been at the same location.
System Description: An intake structure was designed and built to obtain irrigation water from the reservoir (Snake River) behind Lower Granite Lock and Dam. There is a gravel filter collection system, with (1)-400 gpm pump and (1)-95 gpm pump. Both pumps operate during the irrigation cycle, and discharge to underground lines and sprinkler heads for irrigation of the park.
Measuring Device: Fischer and Porter Company Liquid Vortex Rate-of-Flow Meter, Model #10LV1211-1DB1
Field Exam: 6/10/1980
Nonirrigation Uses: NONE
Other Uses: NONE
Other WRs Used: NONE for the same purpose 85-7058 (domestic use only)
Supplemental Water: NONE
Basis of Claim: License
Priority Date: 2/25/1977 (same as license)
Evidence of Priority: A purchase order/invoice/voucher dated 2/24/1977 for payment of statutory exam fee for appropriation of Public Waters, Lower Granite Project, Hells Gate Park Recreational Area.
Publisher's Affidavit of Publication 3/3/1977 (claiming priority date 2/25/1977)

NOTES:

Notes in Remarks:

- (1) License incorrectly described POD. Correct POD is T35N, R6W, S26 NWNW. Although POD location has never changed, this should be considered an accomplished transfer.
- (2) License incorrectly described POU in S23. Correct tracts are in the NW & SW, T35N, R6W, S23, as shown on copy of Corps sketch map. POU location has never changed, although this should be considered as an accomplished transfer.

NOTES:

(3) 2004 Imagery of Hells Gate State Park, Lease No. DACW[^]-1-75-25, is shown on map dated 6/11/07.

Season of Use on claim is 3/1 - 10/31; on license it is 3/1 - 10/1; IDWR std. Is 2/15 - 11/30
US Dept. of Defense, Dept. of Army, Corps of Engineers owns the land for POU. IDP&R leases the land. To ensure this WR was not lost, IDP&R filed a notice of claim.

**11/19/1981 letter from the Dept. of the Army stated that the maximum rate of flow diverted during the 1981 season was 480 gpm (derived on their flow meter).
480/448.8=1.07 cfs.**

See spreadsheet comparing License, Late Claim, and Field Exam.

Acreage does not show up correctly for individual parcels on the Adj. Report, but shows up correctly on the report that is sent to the court (Carter said it is compromised, and as long as it shows up correctly on the copy that the court receives, that's all we care about)

Recommendation:

C18

C05 accomplished change in POU

C03 accomplished change in POD

S39 season of use IDWR std is 2/15-11/30; claim was 3/1-10/31; License is 3/1-10/1

License is 1.07 cfs for 55 acres, or 0.019454545/acre or 0.0195/acre (LIMITING FACTOR)

165.0 AF/55 acres = 3.0 AF/acre = 45.5 X 3.0 AF = 136.5 AF

45.5 Acres X 0.0195 cfs = 0.89 cfs
