

COMMUNICATION MEMORADUM

IDWR Employee: Danielle Favreau

Date: 12/19/06

Claim No(s): 75-4197B

Contact: Lloyd Morton

Details:

Spoke to Lloyd Morton regarding email from Scott Ziegler and faxes in support of increased cfs. I relayed that the original claim filed by Robert Morton in 1982 as well as the adjudication claim in 1990 specified the recommended amount of 3.36 cfs. (I have sent a copy of the original claim to Lloyd.) I mentioned that the flow records and the diversion specifications sent were compelling evidence that additional cfs has been diverted but that due to time constraints limits IDWR's ability to correct the problem to everyone's satisfaction before delivery of the Director's Report to the court. I asked that the Kane Ramey Ditch Co. please file an objection and that IDWR and the company will have time to meet and discuss the problem, perhaps do a soil study if more than 2.5 in/acre is required. Mr. Morton asked when the Director's Report will be sent. I said that the mailing will be out probably within the first 2 weeks of January. At the close of the conversation, I asked Mr. Morton to call me if he has any problems filing the objection or has other questions.
