RE: Notice of Error reply for water right claim number 29-11342.

Dear Mr. Sieverson:

Thank you for returning the notice of error for the above referenced water right. Upon it you indicated that the water right recommendation should delete the "other provisions" and that the purpose of use should be changed from Municipal to Industrial.

I have reviewed the adjudication file for this water right claim and comment the following:

1. The use of the well appears to be (in 1987) for the provision of water to three businesses, three homes, and 15 acres of irrigated land.
2. Review of "Exhibit A" demonstrates a well capacity of about 0.5 cfs. Theoretical calculation for the well (attached) demonstrates nearly the same.
3. Review of "Exhibit A" also demonstrated a pump test performed on July 22, 1951.

In order to make these changes, we require you to amend your claim to a water right number 29-11342. A copy of the amended water right is included with the proposed changes shown in red. In the amended water right, we have updated the diversion amounts and apportioned them to reflect the current uses (1987) of the claim: three businesses, three homes, and the irrigation of 15 acres of land. We have also revised the priority date to reflect the earliest date of pumping to be July 22, 1951, the date of the first pump test.

Please sign the amended claim to a water right, have it notarized, and return to my attention as soon as possible so the revised recommendation may be performed prior to publishing the Director's report for the SRBA.

If you have any questions regarding this matter, please feel free to call me at 525-7161.

Respectfully submitted,

W. Roger Warner
Adjudication Specialist
