RE: Water Rights in Reporting Area 13, Basin 63
Snake River Basin Adjudication (SRBA)

Dear Water Right Claimant(s):

Please find enclosed the Idaho Department of Water Resources recommendations for your water right claim(s) in Basin 63 for the Boise River drainage basin above Lucky Peak dam. We have also enclosed instructions for reviewing (1) your recommended water right(s), and (2) other recommended right(s) in your area. Water rights for nearly all domestic and/or stockwater rights were recommended separately in an earlier report, and most of those now have been decreed by the SRBA Court.

Note that you have until January 31, 2003, in which to review your water rights or those of other claimants and to file any objection to our recommendations. Information on the other water rights can be found at the county courthouses in Boise, Fairfield, Idaho City, and Mountain Home, and at all the Idaho Department of Water Resources offices (see addresses in enclosures).

If the SRBA Court does not receive an objection to our recommendation from you and no other party objects to your water right, your water right will be decreed early next year as recommended. You will receive your decree from the SRBA Court.

Completion of the SRBA is important for the future of water management in Idaho. We invite you to contact our regional offices with any questions you have about your water right(s) or this adjudication process.

Sincerely,

Karl J. Dreher
Director

RE: MEETING WITH WILLIAM RODMAN

On January 11, 2002 I met with William Rodman at his residence at 2327 Mountain View Drive, Boise. The purpose of the meeting was to discuss the differences between the above referenced claims and the uses described in water right licenses 63-2117 & 63-2338. Mr. Rodman indicated they have owned their patented land in the area of Quartzburg for more than 30 years and they have not mined or authorized mining on any land except their own. He also said they do not have any mining claims of record with the BLM.

Mr. Rodman indicated they have never mined their land themselves but have in the past leased it or allowed others to mine on their property. He thought it had been 12-15 years since any active mining took place. When there was mining, portable pumps were used along both Granite Creek and Confederate Gulch. He indicated there has not been any domestic uses in the area of Quartzburg from Granite Creek for as long as they have held the patents. Any domestic water needed was diverted from the old Iowa and Gold Hill Mine shafts.

Based on the information provided by William Rodman, it appears the changes of uses described in the claims can be allowed as accomplished changes and there would not be injury to other rights on either source.
