Water Right Nos.: 63-2916

Contacts: Ron Davison (L. G. Davison & Sons Inc.)

Narrative:

Met with Ron Davison 10/24/01: I GPSed the location for the POD and done a Manning measurement of the west & east ditches for permit 63-2598. See photos in file.

DIVERTING WORKS & POD: The POD overlaps with permit 63-2598. Earth rock dam(s) diverts into two ditches. West and east ditches. See photos 1 & 2 in file. The earth dams are within a few feet of each other. The 1987 NAPP photo layout shows system diagram. Gravity flow ditches for irrigation.

SOURCE: Spring Creek tributary to Smith Creek. See X63 TOPO map in file.

SEASON OF USE: I'm recommending the standard season the uses. IDWR has established the season of use geographically in Arc View for irrigation. (4/1-10/31) The standard season of use for stock water is all year round. The ambiguous license did not list the season of use for stock water or irrigation uses, nor the type or number of stock.

PLACE OF USE: The place of use is shown on 1987 NAPP photo layout in file. Tax lot information in Arc View indicates it belongs to claimant.

AMBIGUOUS LICENSE: The license did not list the season of use for stock water or irrigation uses, nor the type or number of stock. The license did not list two points of diversion in POD. Two ditches are shown in the beneficial use field map. The license also may have error in the location of the POD because of poor maps available at that time. Recommended as an accomplished POD transfer.

Ok per 1987 NAPP photo. No injury found.

OVERLAP REVIEW: Spring Creek permit 63-2598 overlaps the same place of use. The permit was field examined during the same day as licensed right 63-2916. Total acre overlap, no additional acres.

The permit provides additional CFS to bring the Spring Creek source up to an inch per acre. Permit is being recommended with same POD & POU.

Overlapping other source is Lava Creek right 63-4881, all have a combined total acres of 117.

See Overlap map and review sheet in file.
