HOW YOU WILL RECEIVE NOTICES IN THE SNAKE RIVER BASIN ADJUDICATION

All documents filed in the Snake River Basin Adjudication other than notices of claims are filed with the court. Notices of claims to water rights filed in the Snake River Basin Adjudication are filed with the Idaho Department of Water Resources. Copies of all documents filed in the Snake River Basin Adjudication will not be mailed to all parties (claimants) in the adjudication.

By order of the court, any document filed with the court will be mailed only to those parties who may be directly affected by it. A monthly docket sheet will be prepared by the department which contains a summary of all documents filed with the court in the previous month and the dates and locations of hearings scheduled for the following three months. The docket sheet will be filed with the district court clerk in each county within the Snake River Basin in Idaho. Copies of the docket sheet may be obtained from any of the offices of the department either in person or by mail; a small fee will be charged to cover the cost of mailing and/or copying. If you wish to receive a copy of the docket sheet each month, you should mark the appropriate place on your notice of claim form. You will be charged a small annual subscription fee to cover the cost of copying and mailing. Copies of any document listed on the docket sheet may be obtained from any of the offices of the department either in person or by mail; a small fee will be charged to cover the cost of mailing and/or copying.

Copies of all notices of claims filed with the department will be available for inspection from all offices of the department. Copies of the notices of claims may be obtained in person or by mail, but you will be charged for the cost of copying and mailing. (A claimant will not be charged for a copy of his or her own notice of claim, and a person who acquires property with water rights for which a notice of claim was filed will not be charged for a copy of the notice of claim filed by the previous owner.)

After the notices of claims have been reviewed, the director will prepare and file a report with the court. Part 1 of the report will contain the director's recommendations as to each water right claimed under state law. Part 2 of the report will list each federal reserved water right claimed. A number of reports will be prepared, one or more for each sub-basin in the Snake River Basin. When the report for your sub-basin is filed with the court, you will be mailed a notice informing you that the report for your sub-basin has been filed. The notice will be sent to the most recent address shown by the department's files. Attached to the notice will be a copy of those portions of the report describing the water rights you have claimed. If you do not agree with the way your water right is described, you may file an objection to the report with the court. You can also file an objection if you disagree with the way other claimant's water rights are described, and the notice will tell you where a copy of the full report is available for inspection. The notice will tell you when and where to file your objection. The notice of filing for each sub-basin report will also be published state-wide in local newspapers.

AUG 24 1992

It is very important that you inform the department in writing of any change in your address. This is to make sure that you receive the notices affecting your water rights that are to be mailed by the department.

If you are acquiring property with water rights in the Snake River Basin water system in Idaho (either by purchase, gift, inheritance, or other means), it is very important that you inquire of the department whether a notice of claim has been filed. If not, you must file a notice of claim or the water right may be declared by the court to no longer exist. If a notice of claim has been filed, it is very important that you file a written notice of change in ownership with the department. The notice of change in ownership must be accompanied by some evidence of the change in ownership, such as a copy of the deed or a property tax statement showing the name of the new owner. Again, this is to make sure that you receive the notices affecting your water rights that are to be mailed by the department.

The cost of the subscription to the docket sheet is \$7.50 for calendar year 1988. The cost of the subscription may increase a small amount for calendar year 1989 if the cost of copying and/or mailing should increase.

If you are planning to file a motion or other pleading (not a notice of claim) with the court (not IDWR), the court has issued an order setting a special procedure that is different from the usual civil rules. A copy of the order may be obtained from any office of IDWR; you may be charged for the cost of mailing and/or copying.

CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to reflect cropping patterns or acceptable standards of water delivery efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. Domestic use is for 1 home.

September 28, 2001

Barry Marcus
Marcus, Merrick, Montgomery, Christian & Hardee
737 North 7th Street
Boise, ID 83702-5595

Dear Mr. Marcus:

During the review of Claim No. 63-10457 for recommendation in the Snake River Basin Adjudication (SRBA) we found a letter from you dated April 10, 2001. In this letter you indicated that you wished to file an objection to the above water right which is currently in the name of Cumer Green.

The Department's procedure for an objection filed prior to the right being recommended to the SRBA Court is to consider the objection during our claim review. If, after the right is recommended, you still wish to object, then the Objection Standard Form 1 should be filed with the SRBA Court. I am enclosing a copy of this form for your review. This form should not be filed with the court until after the right has been recommended.

Enclosed is a copy of the Department's Director's Memorandum for Application Processing No. 51 (aka Permit Processing No. 16 and Adjudication Memo No. 31). This memorandum gives Departmental guidelines on using a theoretical calculation for a groundwater source. The Department does not use the well test from the well driller's report for permit approval or licensing. Well logs reflect an estimate of production by the well driller at the time the well was drilled.

We are tentatively planning on having the report ready for the Upper Boise River drainage in the late spring of 2002. At that time we will send a Preliminary Notice to water right claimants allowing time for their comments and corrections. We will then submit the Director's Report to the SRBA Court. At that time objections may be filed with the SRBA court either on your own claims or others.

If you have any questions concerning this letter, please feel free to contact this office.

Sincerely,

JAN SHURTE
Water Rights Supervisor

Attn: Jan Shurte
2735 Airport Way
Boise, ID 83705

Re: Cumer Green
WR 5809 NP
No. 63-10457

Dear Ms. Shurte:

I have received a copy of Cumer Green's letter dated April 3, 2001 in response to our objection to water right filing in the Snake River Adjudication and our request that Mr. Green voluntarily cooperate in an independent test of his well. In that letter he claims that the water rights were properly issued and beneficial use determined as required by statute and applicable rules. We dispute this claim. It does not appear that there was any determination of actual beneficial use at the time the license was issued, other than the well log.

I.C. § 42-217 requires that, upon receipt of the applicant's proof of beneficial use, the Department **shall** examine, or cause to be examined:

"2. The capacities of the ditches or canals or other means by which such water is conducted to such place of use and **the quantity of water which has been beneficially applied for irrigation or other purposes.**"

I.C. § 42-219 provides that:

"(1) Upon receipt by the Department of Water Resources of all of the evidence in relation to such proof, **it shall be the duty of the Department to carefully examine the same, and if the Department is satisfied that**

the law has been fully complied with and that the water is being used at the place claimed and for the purpose for which it was originally intended, the Department shall issue to such user or users a license confirming such use. Such license shall be issued under the seal of the office of the Department of Water Resources, and shall state the name and post office address of such user, the purpose for which such water is used, the quantity of water which may be used, which in no case shall be in an amount in excess of the amount that has been beneficially applied."

These statutes require careful examination and satisfaction that the water requested is actually applied to beneficial use.

It was incumbent upon the Department to verify the actual amount of water that **was being used**, at the time it approved Mr. Green's license. The license could not have been legally issued for more water than could actually be produced by the well. The file does not indicate that such examination was ever made. The report filed by Mr. Chapman reflects only a theoretical calculation of a quantity of water which could be pumped from the well, assuming that the water was available. Mr. Chapman did not purport to determine the actual capacity of the well or the quantity of water that was actually being used. In fact, his report states: "no flow measurement possible with existing system." (Beneficial Use Field Report dated June 20, 1988, § D.2.) Mr. Chapman's measurement of .18cfs. (81 gpm) is totally theoretical. The only evidence in the file regarding actual beneficial use is the well driller's report which showed that the well produced 20 gpm after two hours of pumping, not 81 gpm. The well log was submitted to the Department by Mr. Chapman on October 31, 1998, after submission of his report on June 30, 1998 but before issuance of the license on August 25, 1989. There is no statute that I am aware of which authorizes the Department to issue a license based on a hypothetical calculation of the capacity of the pump.

Mr. Green's water rights expert, David B. Shaw, addressed the production from Mr. Green's well in a report filed with the Boise County Commissioners in connection with the Osprey Subdivision application. I have attached a copy of a portion of that report. The chart entitled "Summary of Well Log Information in the Vicinity of the Proposed Osprey Subdivision" appears on page 2 of Mr. Shaw's report. Well No. III is Mr. Green's well, which is the subject of his Water Right No. 63-10457. Even though Mr. Green's license is for 81 gpm, Mr. Shaw, after reviewing Mr. Green's water right file, including the well log, chose to represent to the Boise County Commissioners that Mr. Green's well only produced 20 gpm. Obviously, Mr. Shaw did not accept Mr. Chapman's hypothetical calculation.

Idaho Department of Water Resources
April 10, 2001
Page 3

It is respectfully requested that Mr. Green's well be test pumped or otherwise properly measured to accurately determine the extent of beneficial use, as required by I.C. §§ 42-1410 and 42-1411.

Thank you for your attention in this matter.

Very truly yours,

MARCUS, MERRICK, MONTGOMERY,
CHRISTIAN & HARDEE, LLP

**WATER SUPPLY REVIEW
For
PROPOSED OSPREY SUBDIVISION**

April 2000

Summary

Water supply for the proposed Osprey Subdivision will apparently be sought from individual wells although the Land Development Application form is not clear. Four well logs accompanied the application along with a vicinity map and the approximate location of the 4 associated wells.

A sufficient ground water supply is essential to the development of the Proposed Osprey Subdivision since there is no alternative municipal system should individual wells fail. The applicant has not provided adequate data or analysis to show that adequate ground water is available for the proposed Osprey Subdivision. The applicant should be required to perform testing to determine the safe yield of the aquifer in and in the immediate vicinity of the subdivision is sufficient to meet the needs of the existing and proposed subdivisions water requirements. The applicant should also be required to show wells within the subdivision will not interfere with one another or with wells outside of the proposed Osprey Subdivision. The data currently available are not sufficient to make these determinations. The applicant must conduct in-the-field testing to provide the data and analysis necessary to show the ground water supply is adequate to meet the needs of the subdivision and can be obtained without impacting other water users.

Discussion

The records of the Idaho Department of Water Resources (IDWR) contain 5 additional well logs in the vicinity. All 9 of the well logs were examined for this review. The approximate locations of all 9 well logs are shown on the attached vicinity map. Copies of all 9 well logs also are attached.

The purpose of this review is to determine if the data available are sufficient to determine the safe yield of the aquifer in the vicinity of the proposed Osprey Subdivision. This aquifer will be the water source for 87 lots already approved in the area and this subdivision request proposes to use the aquifer to supply water for an additional 89 lots.

IDWR assumes the typical single family home uses an average of 1,100 gallons of water per day (gpd) on an annual basis. This use includes both indoor and outdoor uses but outdoor uses typically occur during the late spring, summer, and early fall with little outdoor use during the late fall, winter, and early spring. IDWR also assumes about half of the 1,100 gpd is used for indoor purposes and about half is used for outdoor purposes. This means the actual average daily water use during the outdoor use season averages about 1,500 gpd per household. Based on an average daily water use of 1,500 gpd, the average daily water demand for the 176 approved and proposed lots is over 250,000 gpd during the late spring, summer and early fall.

The table below summarizes the information available from the well logs regarding water levels, well depths and discharge rates, and when the wells were constructed. Unfortunately, only the well log for well V includes any drawdown information associated with the pump tests. The log for well V clearly shows the drawdown in the well was 30 feet after pumping at 20 gallons per minute (gpm) for 4 hours. The remaining well logs only show the depth of the pump or air line (pumping level) during the test. This information could be used to approximate a maximum drawdown but does not give the actual drawdown. For example, well I has a static water level of 173 feet in depth and the pumping level during the well test was 350 feet in depth. The well test information from the well log indicates the well produced a maximum of 27 gpm when water was blown from the well from a depth of 350 feet. 177 feet below the static water level. None of the well logs provide any well recovery rate information.

Summary of Well Log Information
In the Vicinity of
The Proposed Osprey Subdivision

Well ID Number	Completion Date	Well Depth Feet	Static Water Level (ft)	Pumping Level Feet	Gallons Per Minute	Time Pumped Hours
I	7/1997	370	173	350	27	2
II	10/1997	350	179	230	4	3
III	5/1987	232	183	200	20	2
IV	9/1997	240	137	240	30	6
V	12/1976	247	115	145*	20	4
VI	9/1997	400	200	385	5	1
VII	10/1998	320	187	300	5	3
VIII	3/1997	266	0"	240	15	5
IX	6/1999	266	140	200	18	1

* Pumping level determined by subtracting drawdown from static water level.

** Well flowed at land surface.

GLO File No. 600 35 1122

Dear Mr. Marcus:

I am in receipt of your letters of March 27, 2001, including a copy of one sent to the Department of Water Resources. Please be advised that I have had my water rights expert, David B. Shaw of ERO Resources Corp. here in Boise, Idaho, review the file relating to my water rights for Green South. Mr. Shaw reports to me that the file clearly shows that the water right was properly issued and beneficial use determined as required by statute and applicable rules.

Re: Cumer Green
WR 5809 NP
No. 63-10457

Dear Ms. Shurte:

We represent Osprey Land Co. and Chapman Ranch, L.L.C., who hereby object to the above referenced claim of water right, a copy of which is attached. According to the Department's records, this well has never been tested. The Department has never confirmed the production of this well, as required by Idaho law. Osprey Land Company and Chapman Ranch, L.L.C. own property and wells in the near vicinity of the Green well. It is respectfully requested that the actual production of the well be established in order to avoid potential conflicts with other wells in the near vicinity.

Thank you for your attention to this matter.

Very truly yours,

MARCUS, MERRICK, MONTGOMERY,
CHRISTIAN & HARDEE, LLP

Barry Marcus

WELL DRILLER'S REPORT

State law requires that this report be filed with the Director, Department of Water Resources
within 30 days after the completion or abandonment of the well.

1. WELL OWNER

Name Green Ranch
Cumey Green
Address _____
Owner's Permit No. _____

7. WATER LEVEL

Static water level 183 feet below land surface.
Flowing? ☐ Yes ☒ No G.P.M. flow _____
Artesian closed-in pressure _____ p.s.i.
Controlled by: ☐ Valve ☐ Cap ☐ Plug
Temperature _____ °F. Quality _____
Describe artesian or temperature zones below.

2. NATURE OF WORK

☒ New well ☐ Deepened ☐ Replacement
☐ Abandoned (describe abandonment procedures such as
materials, plug depths, etc. in lithologic log)

8. WELL TEST DATA

☐ Pump ☐ Bailor ☒ Air ☐ Other _____

Discharge G.P.M.	Pumping Level	Hours Pumped
<u>209 PM</u>	<u>200'</u>	<u>2</u>

3. PROPOSED USE

☒ Domestic ☐ Irrigation ☐ Test ☐ Municipal
☐ Industrial ☐ Stock ☐ Waste Disposal or Injection
☐ Other _____ (specify type)

9. LITHOLOGIC LOG

Bore Diam.	Depth		Material	Water	
	From	To		Yes	No
10"	0	1	Brown top soil		☒
10"	1	15	Brown clay		☒
10"	15	28	Black rock		☒
10"	28	80	Black rock cracked		☒
10"	80	155	Black rock solid		☒
10"	155	165	Brown clay		☒
10"	165	218	Black rock		☒
10"	218	272	Brown & white gravel & sand	☒	
6"	272		Gray granite		☒

4. METHOD DRILLED

☒ Rotary ☒ Air ☐ Hydraulic ☐ Reverse rotary
☐ Cable ☐ Dug ☐ Other _____

5. WELL CONSTRUCTION

Casing schedule: ☐ Steel ☐ Concrete ☐ Other _____
Thickness Diameter From To
250 inches 10 inches + 1 feet 11 feet
250 inches 6 inches + 2 feet 225 1/2 feet
Was casing drive shoe used? ☒ Yes ☐ No
Was a packer or seal used? ☐ Yes ☒ No
Perforated? ☐ Yes ☐ No
How perforated? ☐ Factory ☐ Knife ☐ Torch
Size of perforation _____ inches by _____ inches
Number From To
_____ perforations _____ feet _____ feet
_____ perforations _____ feet _____ feet
_____ perforations _____ feet _____ feet
Well screen installed? ☐ Yes ☒ No
Manufacturer's name _____
Type _____ Model No. _____
Diameter _____ Slot size _____ Set from _____ feet to _____ feet
Diameter _____ Slot size _____ Set from _____ feet to _____ feet
Gravel packed? ☐ Yes ☐ No ☐ Size of gravel _____
Placed from _____ feet to _____ feet
Surface seal depth 15 Material used in seal: ☐ Cement grout
☐ Bentonite ☒ Puddling clay ☐ _____
Sealing procedure used: ☐ Slurry pit ☐ Temp. surface casing
☒ Overbore to seal depth
Method of joining casing: ☐ Threaded ☒ Welded ☐ Solvent
Weld
☐ Cemented between strata
