Subject: water mixes

Hi Lori,

Got your message on the phone. The 4" pipe breaks to the two 2" pipes. The one goes to a hose spigot at the bar before it continues to the overflow pond to go off the waterwheel. The second pipe goes straight to the greenhouse and has one or two spigots along the way. The hot and cold don't mix until we sprinkle them together. (we don't want to risk having the potential of the cold water that is not drinkable mixing in with the pipe lines of clean drinking water) They don't ever connect directly. Any other questions feel free to call or write.

Thanks! Scott

 I saw no evidence of this while conducting
