Dear Mike,

Our office received your Notice of Error May 16, 2002 for the above claim. In order to change the ownership (name changes) of SRBA claim 63-9942 first a required "Change of Water Right Ownership Form" must be received. It needs to be submitted with the completed information, form 42-248/42-1409(6) July 2000. See enclosure.

One of the major requirements is that the new owners must sign the form. They shall also provide proof of the ownership changes which basically is a chain of title shown by warranty, quitclaim deeds etc. from the current claimant owners of record to the new owners of record.

The quitclaim deed you have sent is not entirely clear showing Catherine Nutsch as a chain of title owner for her interest of claim 63-9942. Why, because Catherine was not identified as a claimant owner of 63-9942. However, I assume she is the widow.

If her name had appeared on the claim, we would just need a copy of the death notice from the local newspaper to show her in the chain of title interest.

We need more evidence she was in fact was the widow of Leo and evidence she acquired his property interests for this claim. The quitclaim deed you have already sent is a part of the chain of title. The additional evidence is needed to fill the gap.

Then when we receive the new owners completed ownership change form, we may be then able to replace Leo with the new owners (names) for this claim.

One more item we need. The quitclaim deed identifies Mining claim No. IMC 13921 - 29893 - which name is PTLA #1, #2, #3. We need a plat map identifying the legal location of the mining property to match the claimed legal description. The claims description is identified as: T02N, R05E, S18, SWNE & SENE. The mining plat map we need must be within the location above.

If you have any questions concerning this letter, please feel free to contact me at this office by phone. If you plan on coming into the office to discuss your filing, please contact me first to make an appointment to guarantee I will be available to assist you.

Sincerely,

Ron Howerton

CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. Use of water under this water right is subject to control by the watermaster of State Water District No. 63
6. Return flow if discharged to a surface water system shall meet Idaho Water Quality Standards.
