FARMERS UNION DITCH CO

ADDITIONAL INFORMATION

DATE: AUGUST 16, 2004

BY: MEL SCHULTE

The primary contact for Farmers Union is Gene Bailey, president (286-7318). Bert Johnson (939-6790) is their vice-president and ditch rider. Bert is very familiar with the delivery system and operation of the company. Both Gene and Bert assisted in the review of Farmers Union's boundary and place of use map.

Farmers Union delivers water in their system for a lot of entities and individuals other than their own shareholders. They assess and deliver water for Boise Valley Irrigation Ditch Co, Capital View Irrigation District and the users of the Jacobs right (63-123) in addition to their own water.

An issue that will likely be challenged and discussed is the ownership of the Jacobs right 63-123). In a 1916 contract Farmers was given one-third of the right and it appears that Capital View owns about one-third of the right. Who owns the other one-third is a mystery at this time and needs further review and verification. At this time we have recommended about one-third to Capital View and the remainder to Farmers Union. These recommendations are likely to change.

Another issue that could come up for discussion is the allocation of delivery loss. Measurements were done on several stretches of the Farmers Union canal to estimate delivery loss. Gene Bailey thinks Farmers Union should receive credit for all delivery loss rather than prorating it among the users because Farmers delivers all of the water. This issue will have to be resolved after the Jacobs right ownership issue is resolved. IT IS POSSIBLE FARMERS UNION WILL HAVE TO FILE ANOTHER BENEFICIAL USE CLAIM FOR DELIVERY LOSS.

The Boise Valley Irrigation Ditch Co boundary and place of use overlaps within the boundary of Farmers Union due to the fact Farmers Union canal delivers in the main canal 875 inches of Boise Valley water past the Boise Valley diversion head gate in Farmer's canal. These two companies should merge into one organization.

The POD for Farmers Union canal was determined by GPS.

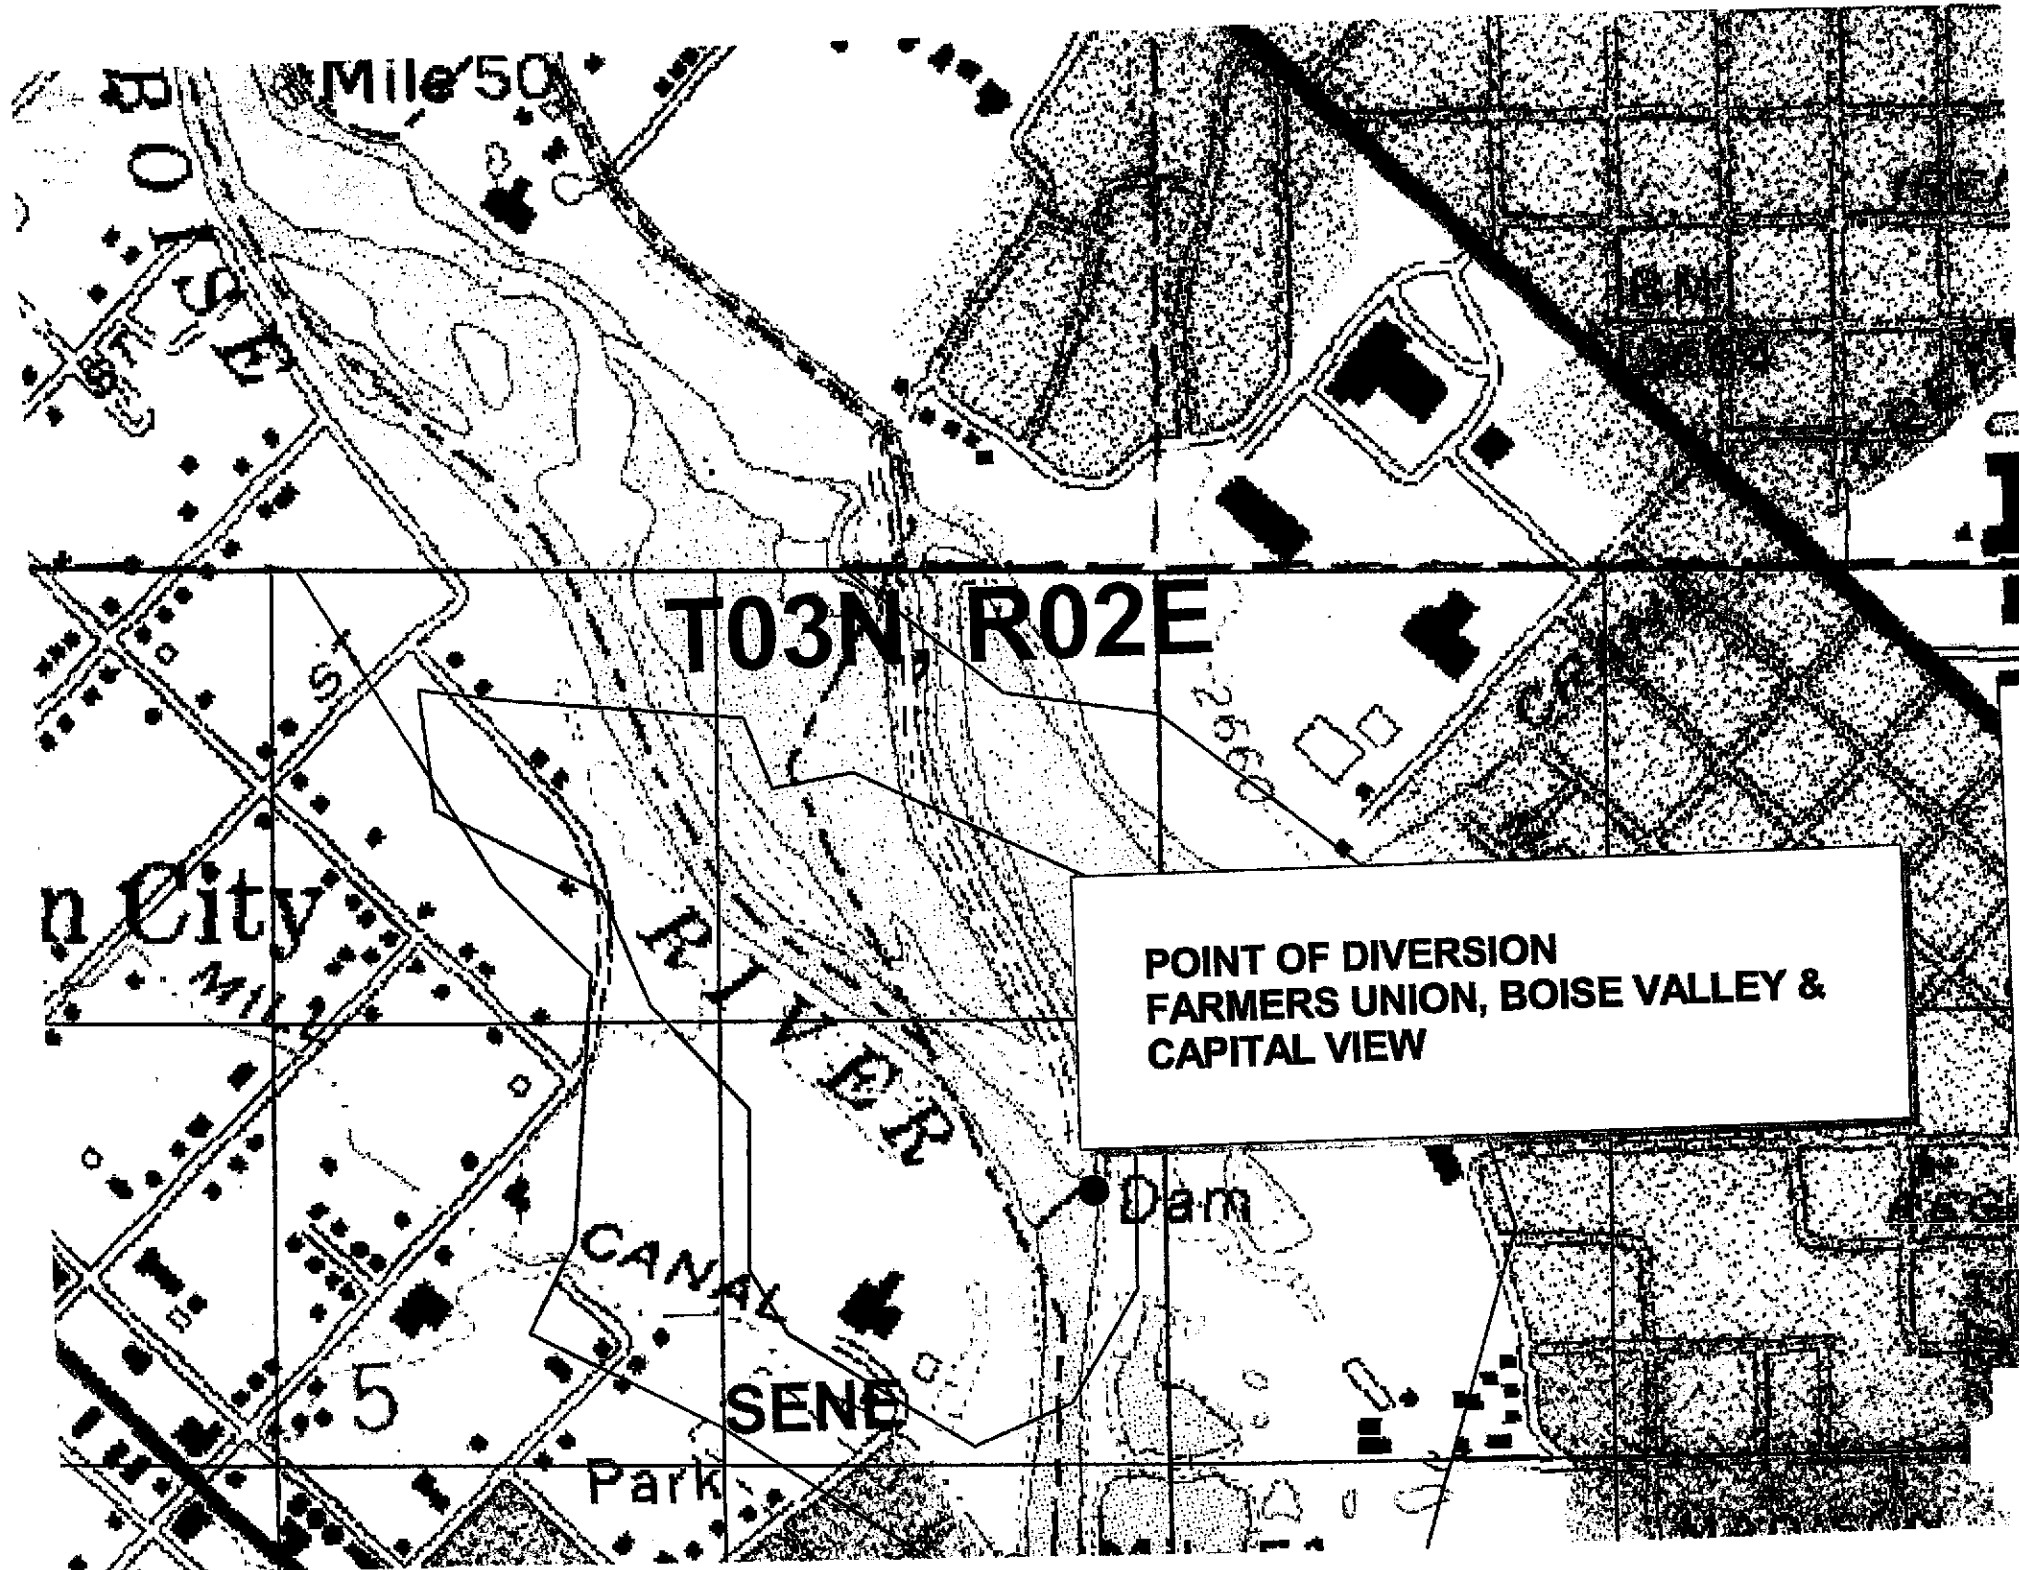

The acre limitation of 8394 acres is based on the claimed acres. The digitized acres total 8857 acres but this number might include some parcels that overlap with Boise Valley because the users are shareholders of both companies.

The total of the diversion rates recommended for Farmers decreed rights include some delivery loss but the exact amount of delivery loss is not known at this time.

TABLE:

Type of Soil	Loss Rate i (Ft/Day)
Medium clay loam.....	0.5 to 1.5
Impervious clay.....	0.5
Medium soils.....	1.0
Somewhat pervious soils.....	1.5 to 2.0
Gravel.....	2.5 to 5.0 = 3.0

WORK SHEET

W = (29' FT) i = (3.0 FT/DAY)(0.0667)

S = 5.80 CFS/MILE

CONVEYANCE LOSS = (S) (LENGTH OF DITCH IN MILES)

CONVEYANCE LOSS = (3 CFS/MILE)(1.01 MILE)

CONVEYANCE LOSS =

5.86 cfs
