Rather than a snapping issue, this appears to be an issue of unintended, extra data existing outside of the shape file. If this extra data containing the SWNE POU was removed, BLM's issue would be resolved.

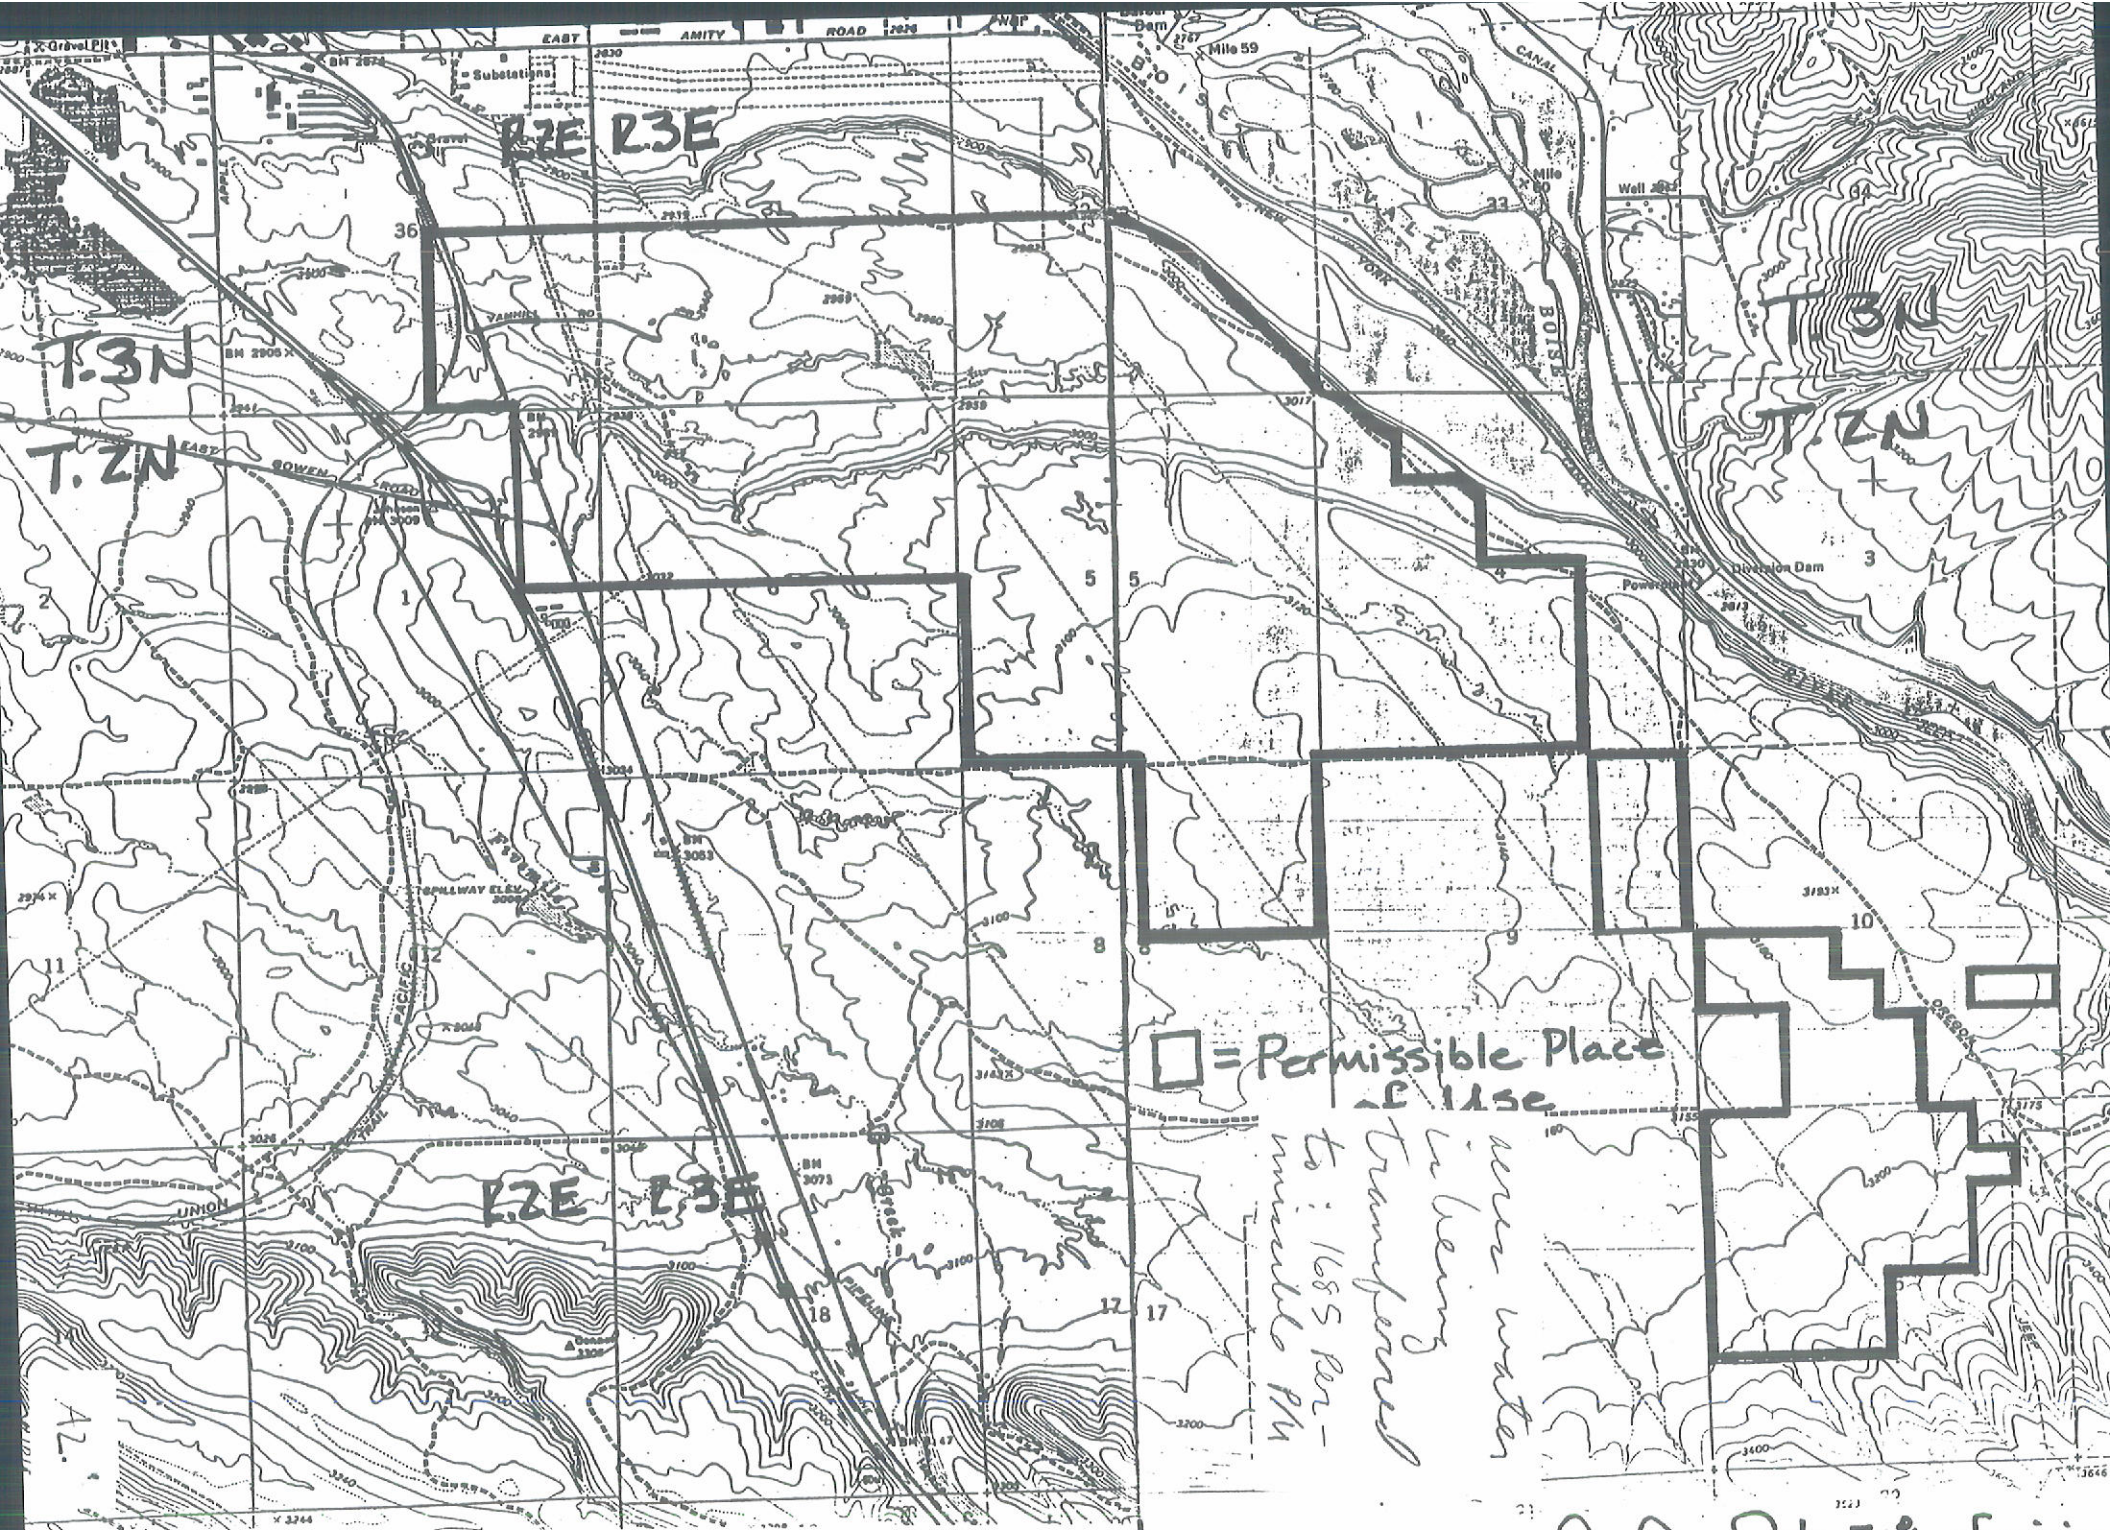

This has already been removed.

Place of Use
2. Describe the changes you wish to make in the proposed recommendation:
Change place of use from 2779.5 acres to 2822.83 acres
2808.43
3. Give a brief explanation as to why you disagree with these portions:
BVID erroneously did not include 28.93 acres in the place of use when discussing the same with IDWR.

BOISE VALLEY IRRIGATION DITCH CO.

ADDITIONAL INFORMATION ABOUT THE BOUNDARY AND PLACE OF USE.

The boundary and place of use for the Boise Valley Irrigation Ditch Co. is not a contiguous shape due the delivery systems and several transfers that moved water from their historical area of delivery to several locations. The largest place of use is approximately 2375 acres lying in the northwest Boise and east Eagle areas.

Boise Valley's water is diverted from the Boise River into the Farmers Union canal. About 1¼ miles downstream a head gate delivers water to the Boise Valley's own canal. The Farmer's Union canal continues to carry about 785 inches of Boise Valley water downstream from the head gate to Boise Valley shareholders. Some of the 785 shares are within the Boise Valley's historic boundary and some are further to the west within the Farmer' Union boundary. This split delivery system causes a fragmented boundary and place of use for Boise Valley that overlaps with the Farmer's Union Canal Co. boundary and place of use.

Several approved transfers have established points of diversion and places of use east of Boise that also contributed to the fragmentation of the company's boundary and place of use. Transfer 67107 moved 5.5 inches of water to irrigate 5.5 acres within a 30.9 acre parcel at the Shakespear Festival site. Approved transfer 71032 moved 10 inches of water to the Shakespear site to irrigate and additional 10 acres within the 30.9 acre parcel. Transfer 5119 was approved to move 3.97 cfs to irrigate 198.4 acres at the Simplot Sports Complex and common areas in Columbia Village. This water is diverted at a pumping station in the Boise River just upstream from the Hwy 21 bridge into a pipe line that serves the Micron plant, the Simplot Complex and United Water's proposed municipal station.

Below is a summary of the place of use acres for Boise Valley :

2375.1 acres	Within the main boundary
15.5 acres	Shakespear Festival site
198.4 acres	Simplot Complex

Conditions of Approval:

1. R04 Use of water under this water right will be regulated by the watermaster of State Water District No. & DISTRICT.
2. R43 The right holder shall maintain a measuring device and lockable controlling works of a type approved by the Department in a manner that will provide the watermaster suitable control of the diversion.
3. R65 This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation of the lands above.
4. T07 The right holder shall accomplish the change authorized by this transfer within one (1) year of the date

IDAHO DEPARTMENT OF WATER RESOURCES

Water Right Report 63-147B

5. T08 Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
6. T09 Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.

Remarks:

1. General Approval of Transfer 5119 does not grant any right-of-way or easement for use of a delivery system owned by person(s) other than the right owner.
During the period beginning October 16 and ending November 15 of any irrigation season, the applicant will forego its right to divert water from the additional point of diversion identified under Transfer 5119 if the amount of water released from Lucky Peak Dam into the Boise River is equal to or less than 240.0 cubic feet per second.
During the period beginning March 16 and ending April 15 of any irrigation season, the applicant will forego its right to divert water from the additional point of diversion identified under Transfer 5119 if the amount of water released from Lucky Peak Dam into the Boise River is equal to or less than 1,100 cubic feet per second.

Comments:

1. CHODGES 7/11/1994 TRANSFER NO. 4381

Comment: Transfer filed 6/8/94 to modify place of use and nature of use of 15 acres irrigation per sale and transfer of Boise Valley Irrigation Ditch Co. shares. Following review of the proposed change, approval represents transfer of acres within the BVID Co. system.

2. PSKAGGS 1/23/1998 TRANSFER 5119

BOISE VALLEY IRRIGATION DITCH CO.

ADDITIONAL INFORMATION ABOUT THE BOUNDARY AND PLACE OF USE.

The boundary and place of use for the Boise Valley Irrigation Ditch Co. is not a contiguous shape due the delivery systems and several transfers that moved water from their historical area of delivery to several locations. The largest place of use is approximately 2375 acres lying in the northwest Boise and east Eagle areas.

Boise Valley's water is diverted from the Boise River into the Farmers Union canal. About 1¼ miles downstream a head gate delivers water to the Boise Valley's own canal. The Farmer's Union canal continues to carry about 785 inches of Boise Valley water downstream from the head gate to Boise Valley shareholders. Some of the 785 shares are within the Boise Valley's historic boundary and some are further to the west within the Farmer' Union boundary. This split delivery system causes a fragmented boundary and place of use for Boise Valley that overlaps with the Farmer's Union Canal Co. boundary and place of use.

Several approved transfers have established points of diversion and places of use east of Boise that also contributed to the fragmentation of the company's boundary and place of use. Transfer 67107 moved 5.5 inches of water to irrigate 5.5 acres within a 30.9 acre parcel at the Shakespear Festival site. Approved transfer 71032 moved 10 inches of water to the Shakespear site to irrigate and additional 10 acres within the 30.9 acre parcel. Transfer 5119 was approved to move 3.97 cfs to irrigate 198.4 acres at the Simplot Sports Complex and common areas in Columbia Village. This water is diverted at a pumping station in the Boise River just upstream from the Hwy 21 bridge into a pipe line that serves the Micron plant, the Simplot Complex and United Water's proposed municipal station.

BOISE VALLEY IRRIGATION DITCH COMPANY CANAL & FARMERS UNION DITCH COMPANY CANAL

Number 514

1974

The Boise Valley Irrigation Ditch Company Canal originates on the north bank of the Boise River in the NE 1/4 of the SE 1/4 of Section 32, T4N, R2E, and runs northwesterly through Sections 29, 30, and 32 of T4N, R2E and Sections 14, 23, and 24 in T4N, R1E. This canal was constructed in the fall of 1865 and spring of 1866 by Seth Bixby, William A. C. Fite, and others. When built, 3,000 inches of water under a four-inch pressure was appropriated and diverted. On October 2, 1894, the Boise Valley Irrigation Ditch Company transferred to the Farmers Union Ditch Company, Ltd., the right to enlarge, use, and maintain the canal; but they retained their 3,000 inches of water right which the latter company was to deliver to stockholders. This was accomplished by inserting a perpetual right clause into the transfer deed. Representatives of Farmers Union had earlier, in April, 1894, filed a water notice to appropriate and divert 15,000 inches of water under a four-inch pressure for their own use.

The Farmers Union Ditch Company began the enlargement of a portion of the old ditch and construction of a new one. In the fall of 1894, they followed the old ditch for one and one-half miles. At this point, the Boise Valley Irrigation Company built a new headgate for delivery of water to their stockholder's lands. Also, at this junction, the new canal began.

A new headgate at the Boise River diversion point was started in the fall of 1894 and completed on March 23, 1895. When finished, it was 48 feet long, 24 feet wide, 20 feet in the clear, and 14 feet high. The canal at first measured ten feet in width on the bottom, sixteen feet surface width, and three feet in depth. It was later enlarged to twelve feet on the bottom and eighteen feet on the top. The original grade of twenty-four inches to the mile was later reduced to twenty inches. In the spring of 1895, water was first diverted through the completed six miles of the canal. In the spring of 1898, the canal was completed to Big Gulch, north of Star. By 1899, it was completed to its entire length of twenty-four miles.

A partial breakdown of the costs expended on construction of this canal shows: \$4,320.80 in 1894, \$6,273.31 in 1895, \$15,979.58 in 1896, and \$16,879.98 in 1897. By the completion of the canal, \$77,858.00 had been spent on its construction. The canal was built by the farmers and 500 shares of stock were issued.

In 1903, the canal maintained a capacity of 130 second feet, extended twenty-four miles in length with fifty-nine miles in laterals, and could service an estimated 10,000 acres. However, at this time, only 4,639 acres of this total were actually irrigated. In addition to this acreage, the

Boise Valley Irrigation Company ditch serviced 3,532 acres of which 2,788.88 acres were irrigated by the twenty-seven stockholders. In 1906, the Boise Valley Irrigation Ditch Company received water right (15) of 2,729 inches. The Farmers Union Ditch Company received water right (126) of 5,500 inches.

The primary contact is Stan Matlock, company president. (853-0992). The company secretary is Pauly Pierce (853-5288).

The company is represented by Ringert & Clark law office, Charley Honsinger.

The primary problem associated with Boise Valley Irrigation Ditch Co is their fragmented boundary and place of use. This problem was created by several approved transfers and the fact some of their water is delivered to several shareholders by Farmers Union ditch to an area far to the West of BVID main delivery area. See the attach memo that further explains this boundary and place of use issue.

The POD's for all of BVID's rights were established by GPS except two that were added by transfer 71032 at the Shakespeare Festival site.

Re: Snake River Basin Adjudication (SRBA) claims review

We are currently reviewing the water right claims filed in the SRBA by all ditch companies and irrigation districts in Ada County prior to preparing our recommendations to the SRBA court. Your claims are part of this review process.

One of the end products resulting from the review process mentioned above will be a map for your organization that will include the land irrigated by your water rights and the outer perimeter boundary of the places of use. You may have already reviewed the boundary and place of use for your water rights with an employee of the department. However, if you have not recently reviewed and returned a map to us please call me at the number below as soon as possible. Establishing the most accurate boundary and place of use for your water rights is a very important initial step in our review process.

The total amount of water we will recommend for your water rights will be based on the standard of one inch (0.02 cubic foot per second) per acre for the actual acres irrigated with your water rights as described in your boundary map. However, it is possible to have additional water for delivery loss within your ditch system and additional water for lands that require more water due to the nature of the soils. We might need additional information from you to quantify the amount of water needed for delivery loss within your canal and ditch system. We might also need from you additional data to support and quantify any excess water in addition to one inch per acre for irrigation that might be necessary.

It is our plan to prepare recommendations for your SRBA claims during the summer of 2003. In order to prepare the most accurate recommendations it's imperative that the boundary and place of use map for your organization be completed before we proceed.

If you need additional information or want to discuss these matters in more detail please call me at the number below.

Cordially,

Mel Schulte
Sr. Water Right Agent

Mr. Dave Fulfill 
Dept. of Water Resources

Dear Dave:

Boise Valley Irrigation Ditch Co. has a problem with developers purchasing land on laterals and not using the irrigation water.

After purchasing the property they sell the water shares so they do not have to use it on the development. This can cause the other water users on the lateral to be short of water and could in some cases cause insufficient water to operate the lateral.

Boise Valley would like to require the developers to use the irrigation water on the subdivision. The objection to this is they do not have continual use. All laterals operate on a rotation schedule.

Boise Valley would like to adopt a system similar to the Gary Lane Meadows Homeowner open park area: which we worked with Idaho Water Resources in obtaining water shares and assigning the share to the nearest lateral for recharge so they could pump from a shallow well or sump.

Boise Valley Ditch Co. would like to be able to require developers to keep the irrigation water in the lateral for ground water recharge and in turn be able to pump from a shallow well or sump of 10'-12'.

The majority of Boise Valley area has a high water table.

We would like for the developers to be able to install pumps in a well consisting of cement pipes stacked on top to each other in a pit no deeper than 12'. This can be excavated with a backhoe and back filled with same.

Although different in design this would be no different than Gary Lane Meadows or the Optimist soccer field, who pump from a pond 12' to 15' deep.

House Valley Irrigation District would appreciate any help you could give us in the adoption of a policy to preserve our water rights and assure a general water shortage.

We would be glad to cooperate with you by having a meeting to discuss this.

Once if this is not your department would you please refer it to the correct department.

Sincerely,

Stanley Matlock

Conditions of Approval:

1. 01D A lockable device, subject to the approval of the Department, shall be installed on the diverting works in a manner that will provide the watermaster suitable control of the diversion.
2. R32 This right when combined with all other rights shall provide no more than .02 cfs per acre nor more than 4.5 afa per acre for irrigation of the lands above.
3. T04 Approval of this transfer in no way grants any right-of-way or easement for use of a delivery system owned by person(s) other than the right owner.
4. T07 The right holder shall accomplish the change authorized by this transfer within one (1) year of the date of this approval.
5. T08 Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
6. T09 Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.

Nick, Susan,

RE: POU on BLM outside digital boundary
T04N, R01E, S11, SWNE (=Lot 1)
63-00147B, 63-02360, 63-31198, and 63-31832

There is a POU on BLM in your data that is outside the digital boundary for Boise Valley Irrigation Ditch Co. It appears that this could

be removed from the data as unintentional. It would save me an objection

if it could be removed. The shapefile (digital boundary) is fine.

Does it seem odd to you that the digital boundary slices through the middle of a subdivision, and excludes part of it (see attached PowerPoint presentation)? If there are tweaks to the digital boundary between now and the final recommendation, please be careful to not accidentally include BLM (snapping issue).

Fred
(See attached file: 63-00147B Boise Valley Irrigation.ppt)

PS: did I construct Susan's email address correctly?

The POU is slightly outside the boundary in 4N 1E S23 NWNW. It amounts to about 1/2 acre. It is on private property.
Fixed POU to include in boundary (fixed boundary to include POU)

Rather than a snapping issue, this appears to be an issue of unintended, extra data existing outside of the shape file. If this extra data containing the SWNE POU was removed, BLM's issue would be resolved.

This has already been removed.

TRANSFER NO. 5119
WATER RIGHT NO. 63-00147B

CONDITIONS OF APPROVAL AND REMARKS

3. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation of the lands above.
4. The right holder shall accomplish the change authorized by this transfer within one (1) year of the date of this approval.
5. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
6. Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.
7. Approval of Transfer 5119 does not grant any right-of-way or easement for use of a delivery system owned by person(s) other than the right owner.
8. During the period beginning October 16 and ending November 15 of any irrigation season, the right holder will forego its right to divert water from the additional point of diversion identified under Transfer 5119 if the amount of water released from Lucky Peak Dam into the Boise River is equal to or less than 240.0 cubic feet per second.
9. During the period beginning March 16 and ending April 15 of any irrigation season, the right holder will forego its right to divert water from the additional point of diversion identified under Transfer 5119 if the amount of water released from Lucky Peak Dam into the Boise River is equal to or less than 1,100 cubic feet per second.

Dated this 4th day of

Chief, Water Allocation Bureau

MEMORANDUM

Date: January 21, 1998

To: Pam

From: Jim Johnson

Subject: Boise Valley Transfer 5119

=====

Finalizing this transfer had been delayed because Vic Conrad was trying to get an amended withdraw of protest from Idaho Rivers United. After several unsuccessful attempts Vic has now asked us to proceed. I have informed him that we propose to approve the transfer as follows.

- Split the water right into A & B
- Part B will not include a permissible place of use
- Part B will show only one point of diversion
- Part B will only include paragraph 1 and 2 of the Withdraw of Protest and Agreement of Conditions.
- A copy of the approved transfer (preliminary order) will be sent to both protestants allowing them to file a petition for reconsideration.

If you have any questions please let me know.
