MEMORANDUM

TO: FILE NO. 63-00230F
FROM: PAM SKAGGS/^{CS}STATE OFFICE
SUBJECT: TRANSFER NO. 4391
DATE: July 31, 1995

Transfer No. 4391 was filed to more specifically identify the irrigation use and change the nature of use of a portion of Right No. 63-00230F, splitting the right into parts L and M.

Originally 39 acres were irrigated within the SESE, S29, but the planned development of a sports complex will reduce the actual irrigated acres to 30. One (1) acre will be converted to a lined pond approximately 5' deep. Water will be diverted directly to the pond to irrigate the 30 acres and for year round storage of 5 af for irrigation and aesthetic purposes.

The portion of the right associated with the remaining 8 acres no longer irrigated provides the rate and associated diversion volume for aesthetic use. Water will only be diverted during the irrigation season with no greater diversion than historically supplied to this land. Net consumptive use will be reduced with 8 acres removed from irrigation use.

Originally:	39 acres x 4.5 af	= 175.5 afa
After Transfer:	30 acres x 4.5 af	= 135.0 afa Irrigation
Pond	1 acre x 5 ft	= 5.0 afa Storage Uses
No Longer Irrigated	8 acres x 4.5 af	= <u>36.0 afa</u> Aesthetic Use
		176.0 afa

Pond Capacity exceeds the diversion volume for 1 acre by 0.5 afa. To compensate for the difference 0.5 afa will be reduced from the diversion volume available for aesthetic use.

135.0 afa + 5.0 afa + 35.5 afa = 175.5 afa

Recommended conditions include watermaster control, measuring device, future reporting, irrigation overlap and standard transfer conditions.

Re: Snake River Basin Adjudication (SRBA) claims review

We are currently reviewing the water right claims filed in the SRBA by all ditch companies and irrigation districts in Ada County prior to preparing our recommendations to the SRBA court. Your claims are part of this review process.

One of the end products resulting from the review process mentioned above will be a map for your organization that will include the land irrigated by your water rights and the outer perimeter boundary of the places of use. You may have already reviewed the boundary and place of use for your water rights with an employee of the department. However, if you have not recently reviewed and returned a map to us please call me at the number below as soon as possible. Establishing the most accurate boundary and place of use for your water rights is a very important initial step in our review process.

The total amount of water we will recommend for your water rights will be based on the standard of one inch (0.02 cubic foot per second) per acre or your historical diversion rate for the actual acres irrigated with your water rights as described in your boundary map. However, it is possible to have additional water for delivery loss within your ditch system and additional water for lands that require more water due to the nature of the soils. We might need additional information from you to quantify the amount of water needed for delivery loss within your canal and ditch system. We might also need from you additional data to support and quantify any excess water in addition to one inch per acre for irrigation that might be necessary.

It is our plan to prepare recommendations for your SRBA claims during the summer of 2003. In order to prepare the most accurate recommendations it's imperative that the boundary and place of use map for your organization be completed before we proceed.

If you need additional information or want to discuss these matters in more detail please call me at the number below.
