ADDITIONAL INFORMATION ABOUT THE BOUNDARY AND PLACE OF USE.

The boundary and place of use for the Boise Valley Irrigation Ditch Co. is not a contiguous shape due the delivery systems and several transfers that moved water from their historical area of delivery to several locations. The largest place of use is approximately 2375 acres lying in the northwest Boise and east Eagle areas.

Boise Valley's water is diverted from the Boise River into the Farmers Union canal. About 1¼ miles downstream a head gate delivers water to the Boise Valley's own canal. The Farmer's Union canal continues to carry about 785 inches of Boise Valley water downstream from the head gate to Boise Valley shareholders. Some of the 785 shares are within the Boise Valley's historic boundary and some are further to the west within the Farmer' Union boundary. This split delivery system causes a fragmented boundary and place of use for Boise Valley that overlaps with the Farmer's Union Canal Co. boundary and place of use.

Several approved transfers have established points of diversion and places of use east of Boise that also contributed to the fragmentation of the company's boundary and place of use. Transfer 67107 moved 5.5 inches of water to irrigate 5.5 acres within a 30.9 acre parcel at the Shakespear Festival site. Approved transfer 71032 moved 10 inches of water to the Shakespear site to irrigate and additional 10 acres within the 30.9 acre parcel. Transfer 5119 was approved to move 3.97 cfs to irrigate 198.4 acres at the Simplot Sports Complex and common areas in Columbia Village. This water is diverted at a pumping station in the Boise River just upstream from the Hwy 21 bridge into a pipe line that serves the Micron plant, the Simplot Complex and United Water's proposed municipal station.

Below is a summary of the place of use acres for Boise Valley :

2375.1 acres	Within the main boundary
15.5 acres	Shakespear Festival site
198.4 acres	Simplot Complex
42.2 acres	Within the United Water service area
19.4 shares	Quong place of use
15.0 shares	Ada County landfill shares
16.0 shares	McCrae place of use
14.6 shares	Hanson place of use
12.97 shares	Moyle place of use
3.33 shares	Charlton place of use
1.0 shares	Canova place of use
43.33 shares	Buckhorn Estates place of use
14.6 shares	ACHD shares
37.0 shares	Veterans Cemetary irrigation

2808.43 acres	Total acres irrigated within the boundaries of Boise Valley Irrigation Co.

RE: POU on BLM outside digital boundary

There is a POU on BLM in your data that is outside the digital boundary for Boise Valley Irrigation Ditch Co. It appears that this could

be removed from the data as unintentional. It would save me an objection

if it could be removed. The shapefile (digital boundary) is fine.

Does it seem odd to you that the digital boundary slices through the middle of a subdivision, and excludes part of it (see attached PowerPoint

presentation)? If there are tweaks to the digital boundary between now and

the final recommendation, please be careful to not accidentally include BLM (snapping issue).

Rather than a snapping issue, this appears to be an issue of unintended, extra data existing outside of the shape file. If this extra data containing the SWNE POU was removed, BLM's issue would be resolved.

ADDITIONAL INFORMATION

DATE: MAY 31, 2005

BY: MEL SCHULTE

The primary contact is Stan Matlock, company president. (853-0992). The company secretary is Pauly Pierce (853-5288).

The company is represented by Ringert & Clark law office, Charley Honsinger.

The primary problem associated with Boise Valley Irrigation Ditch Co is their fragmented boundary and place of use. This problem was created by several approved transfers and the fact some of their water is delivered to several shareholders by Farmers Union ditch to an area far to the West of BVID main delivery area. See the attach memo that further explains this boundary and place of use issue.

The POD's for all of BVID's rights were established by GPS except two that were added by transfer 71032 at the Shakespeare Festival site.

MTS

BOISE VALLEY IRRIGATION DITCH CO.

ADDITIONAL INFORMATION ABOUT THE BOUNDARY AND PLACE OF USE.

The boundary and place of use for the Boise Valley Irrigation Ditch Co. is not a contiguous shape due the delivery systems and several transfers that moved water from their historical area of delivery to several locations. The largest place of use is approximately 2375 acres lying in the northwest Boise and east Eagle areas.

Boise Valley's water is diverted from the Boise River into the Farmers Union canal. About 1¼ miles downstream a head gate delivers water to the Boise Valley's own canal. The Farmer's Union canal continues to carry about 785 inches of Boise Valley water downstream from the head gate to Boise Valley shareholders. Some of the 785 shares are within the Boise Valley's historic boundary and some are further to the west within the Farmer' Union boundary. This split delivery system causes a fragmented boundary and place of use for Boise Valley that overlaps with the Farmer's Union Canal Co. boundary and place of use.

Several approved transfers have established points of diversion and places of use east of Boise that also contributed to the fragmentation of the company's boundary and place of use. Transfer 67107 moved 5.5 inches of water to irrigate 5.5 acres within a 30.9 acre parcel at the Shakespear Festival site. Approved transfer 71032 moved 10 inches of water to the Shakespear site to irrigate and additional 10 acres within the 30.9 acre parcel. Transfer 5119 was approved to move 3.97 cfs to irrigate 198.4 acres at the Simplot Sports Complex and common areas in Columbia Village. This water is diverted at a pumping station in the Boise River just upstream from the Hwy 21 bridge into a pipe line that serves the Micron plant, the Simplot Complex and United Water's proposed municipal station.

Below is a summary of the place of use acres for Boise Valley :

2375.1 acres	Within the main boundary

Re: Snake River Basin Adjudication (SRBA) claims review

We are currently reviewing the water right claims filed in the SRBA by all ditch companies and irrigation districts in Ada County prior to preparing our recommendations to the SRBA court. Your claims are part of this review process.

One of the end products resulting from the review process mentioned above will be a map for your organization that will include the land irrigated by your water rights and the outer perimeter boundary of the places of use. You may have already reviewed the boundary and place of use for your water rights with an employee of the department. However, if you have not recently reviewed and returned a map to us please call me at the number below as soon as possible. Establishing the most accurate boundary and place of use for your water rights is a very important initial step in our review process.

The total amount of water we will recommend for your water rights will be based on the standard of one inch (0.02 cubic foot per second) per acre for the actual acres irrigated with your water rights as described in your boundary map. However, it is possible to have additional water for delivery loss within your ditch system and additional water for lands that require more water due to the nature of the soils. We might need additional information from you to quantify the amount of water needed for delivery loss within your canal and ditch system. We might also need from you additional data to support and quantify any excess water in addition to one inch per acre for irrigation that might be necessary.

It is our plan to prepare recommendations for your SRBA claims during the summer of 2003. In order to prepare the most accurate recommendations it's imperative that the boundary and place of use map for your organization be completed before we proceed.

If you need additional information or want to discuss these matters in more detail please call me at the number below.

Cordially,

Mel Schulte
Sr. Water Right Agent

Mr. Dave Tuthill ^{DN}
Dept. of Water Resources
1301 N. Orchard
Boise, ID 83706

Dear Dave:

Boise Valley Irrigation Ditch Co. has a problem with developers purchasing land on laterals and not using the irrigation water.

After purchasing the property they sell the water shares so they do not have to use it on the development. This can cause the other water users on the lateral to be short of water and could in some cases cause insufficient water to operate the lateral.

Boise Valley would like to require the developers to use the irrigation water on the subdivision. The objection to this is they do not have continual use. All laterals operate on a rotation schedule.

Boise Valley would like to adopt a system similar to the Gary Lane Meadows Homeowner open park area; which we worked with Idaho Water Resources in obtaining water shares and assigning the share to the nearest lateral for recharge so they could pump from a shallow well or sump.

Boise Valley Ditch Co. would like to be able to require developers to keep the irrigation water in the lateral for ground water recharge and in turn be able to pump from a shallow well or sump of 10'-12'.

The majority of Boise Valley area has a high water table.

We would like for the developers to be able to install pumps in a well consisting of cement pipes stacked on top to each other in a pit no deeper than 12'. This can be excavated with a backhoe and back filled with same.

Although different in design this would be no different than Gary Lane Meadows or the Optimist soccer field, who pump from a pond 12'to 15' deep.

Page 2

Boise Valley Irrigation Ditch Co. would appreciate any help you could give us in the adoption of a policy to preserve our water rights and assure a ground water recharge.

We would be glad to co-operate with you by having a meeting to discuss this.

Dave if this is not your department would you please refer it to the correct department.

Sincerely,

A handwritten signature in cursive script that reads "Stanley Matlock".

Stanley Matlock,
President
