2. 155 This right shall receive 100 percent of its decreed quantity until the natural flow of the waters of the Boise River shall decrease so that all rights containing this condition cannot receive 100 percent of their decreed quantities, at which time this right and the other rights containing this condition shall first be cut to 75 percent of their decreed quantities, as the natural flow of the river decreases, beginning with the latest rights containing this condition and preceding to the earliest rights containing this condition in the order of their priority dates, and after all of the rights containing this condition shall have been reduced to 75 percent of their decreed quantities, should the natural flow of the waters of the river decrease below the amount necessary to supply 75 percent of those decreed quantities, then this right and the other rights containing this condition, beginning with the latest and preceding to the earliest, shall be reduced to 60 percent of their decreed quantities.
3. C18 This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

FARMERS UNION DITCH CO

ADDITIONAL INFORMATION

DATE: AUGUST 16, 2004

BY: MEL SCHULTE

The primary contact for Farmers Union is Gene Bailey, president (286-7318). Bert Johnson (939-6790) is their vice-president and ditch rider. Bert is very familiar with the delivery system and operation of the company. Both Gene and Bert assisted in the review of Farmers Union's boundary and place of use map.

Farmers Union delivers water in their system for a lot of entities and individuals other than their own shareholders. They assess and deliver water for Boise Valley Irrigation Ditch Co, Capital View Irrigation District and the users of the Jacobs right (63-123) in addition to their own water.

An issue that will likely be challenged and discussed is the ownership of the Jacobs right 63-123). In a 1916 contract Farmers was given one-third of the right and it appears that Capital View owns about one-third of the right. Who owns the other one-third is a mystery at this time and needs further review and verification. At this time we have recommended about one-third to Capital View and the remainder to Farmers Union. These recommendations are likely to change.

Another issue that could come up for discussion is the allocation of delivery loss. Measurements were done on several stretches of the Farmers Union canal to estimate delivery loss. Gene Bailey thinks Farmers Union should receive credit for all delivery loss rather than prorating it among the users because Farmers delivers all of the water. This issue will have to be resolved after the Jacobs right ownership issue is resolved. IT IS POSSIBLE FARMERS UNION WILL HAVE TO FILE ANOTHER BENEFICIAL USE CLAIM FOR DELIVERY LOSS.

The Boise Valley Irrigation Ditch Co boundary and place of use overlaps within the boundary of Farmers Union due to the fact Farmers Union canal delivers in the main canal 875 inches of Boise Valley water past the Boise Valley diversion head gate in Farmer's canal. These two companies should merge into one organization.

The POD for Farmers Union canal was determined by GPS.

The acre limitation of 8394 acres is based on the claimed acres. The digitized acres total 8857 acres but this number might include some parcels that overlap with Boise Valley because the users are shareholders of both companies.

The total of the diversion rates recommended for Farmers decreed rights include some delivery loss but the exact amount of delivery loss is not known at this time.
