Mr. Dave Farhadi *DFW*
Dept. of Water Resources
1301 N. Orchard
Boise, ID 83706

Dear Dave:

Boise Valley Irrigation Ditch Co. has a problem with developers purchasing land on laterals and not using the irrigation water.

After purchasing the property they sell the water shares so they do not have to use it on the development. This can cause the other water users on the lateral to be short of water and could in some cases cause insufficient water to operate the lateral.

Boise Valley would like to require the developers to use the irrigation water on the subdivision. The objection to this is they do not have contractual use. All laterals operate on a rotation schedule.

Boise Valley would like to adopt a system similar to the Gary Lane Meadows Homeowner open park area which we worked with Idaho Water Resources in obtaining water shares and assigning the share to the nearest lateral for recharge so they could pump from a shallow well or sump.

Boise Valley Ditch Co. would like to be able to require developers to keep the irrigation water in the lateral for ground water recharge and in turn be able to pump from a shallow well or sump of 10'-12'.

The majority of Boise Valley area has a high water table.

We would like for the developers to able to install pumps in a well consisting of cement pipes stacked on top to each other in a pie or deeper than 12'. This can be excavated with a backhoe and back filled with sand.

Although different in design this would be no different than Gary Lane Meadows or the Opamist soccer field, who pump from a pond 12' to 15' deep.

The Valley Irrigation District would appreciate your help and
the Government's assistance with money to preserve our country's
and a more efficient water supply.

Thank you for your help and assistance in having a meeting in
our section.

Also if you have your department in a building, please refer it to
the correct department.

Sincerely,

Stanley Matlock

ADDITIONAL INFORMATION ABOUT THE BOUNDARY AND PLACE OF USE.

The boundary and place of use for the Boise Valley Irrigation Ditch Co. is not a contiguous shape due the delivery systems and several transfers that moved water from their historical area of delivery to several locations. The largest place of use is approximately 2375 acres lying in the northwest Boise and east Eagle areas.

Boise Valley's water is diverted from the Boise River into the Farmers Union canal. About 1¼ miles downstream a head gate delivers water to the Boise Valley's own canal. The Farmer's Union canal continues to carry about 785 inches of Boise Valley water downstream from the head gate to Boise Valley shareholders. Some of the 785 shares are within the Boise Valley's historic boundary and some are further to the west within the Farmer' Union boundary. This split delivery system causes a fragmented boundary and place of use for Boise Valley that overlaps with the Farmer's Union Canal Co. boundary and place of use.

Several approved transfers have established points of diversion and places of use east of Boise that also contributed to the fragmentation of the company's boundary and place of use. Transfer 67107 moved 5.5 inches of water to irrigate 5.5 acres within a 30.9 acre parcel at the Shakespear Festival site. Approved transfer 71032 moved 10 inches of water to the Shakespear site to irrigate and additional 10 acres within the 30.9 acre parcel. Transfer 5119 was approved to move 3.97 cfs to irrigate 198.4 acres at the Simplot Sports Complex and common areas in Columbia Village. This water is diverted at a pumping station in the Boise River just upstream from the Hwy 21 bridge into a pipe line that serves the Micron plant, the Simplot Complex and United Water's proposed municipal station.

Below is a summary of the place of use acres for Boise Valley :

2375.1 acres	Within the main boundary

IN THE MATTER OF TRANSFER)
NOS. 67019 AND 67107 IN THE)

PRELIMINARY ORDER WITHDRAWING
ORDERS APPROVING TRANSFERS AND
AMENDING TRANSFER APPROVALS

This matter having come before the Department of Water Resources (Department) as a result of the filing of a petition to correct certain transfer approvals, the Department makes the following Findings of Fact, Conclusions of Law, and Order:

FINDINGS OF FACT

1. On February 12, 2001, the Department issued an order approving Transfer No. 67019 in the name of Boise Valley Irrigation Ditch Co. The transfer changed the point of diversion and place of use for part of Water Right No. 63-147A, splitting the water right into nos. 63-147C and 63-147D. Prior to the transfer, Water Right No. 63-147A authorized 50.61 cfs and 10546.2 af for irrigation of 2343.6 acres. The transfer authorized a change in the point of diversion and place of use for 0.79 cfs and 190 af for irrigation of 42.2 acres under Water Right No. 63-147D. By subtraction, the irrigated acreage and corresponding diversion volume remaining for the un-transferred portion of Water Right No. 63-147A would be 2301.4 acres and 10356.3 af. The order approving the transfer provided for 49.82 cfs and 9872.1 af for irrigation of 2193.8 acres under Water Right No. 63-147C thereby reducing the irrigated acreage and diversion volume amounts by 107.6 acres and 484.2 af. The reduction was based on a forfeiture review by the Department for the place of use listed under Water Right No. 63-147A.
2. On April 10, 2001, the Department issued an order approving Transfer No. 67107 in the Name of Boise Valley Irrigation Ditch Co. The transfer changed the point of diversion and place of use for part of Water Right No. 63-147C, splitting the water right into nos. 63-31197 and 63-31198. The transfer authorized a change in the point of diversion and place of use for 0.11 cfs and 24.7 af for 5.5 acres within a 30.9 acre permissible place of use under Water Right No. 63-31198. The order approving the transfer provided for 49.71 cfs and 9847.4 af for irrigation of 2188.3 acres under Water Right No. 63-31197 for the un-transferred portion of Water Right No. 63-147C.
3. On April 26, 2001, the Department received a petition from Charles L. Honsinger, Attorney for Boise Valley Irrigation Ditch Co., asking the Department to reverse its decision to reduce

the acreage and volume elements of Water Right No. 63-147C and correct the approvals for Transfer Nos. 67019 and 67107 accordingly.

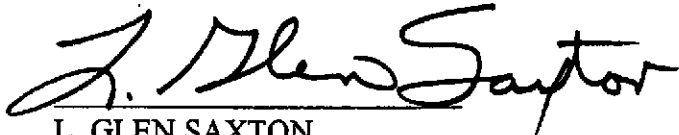

CONCLUSIONS OF LAW

1. The un-transferred portion of Water Right No. 63-147A should not have been subjected to a forfeiture reduction in the irrigated acreage and diversion volume amounts in the approval of Transfer No. 67019 because the un-transferred portion was not the subject of the transfer.
2. The Department should withdraw the order approving Transfer No. 67019 and issue an amended transfer approval to correct the irrigated acreage and diversion volume amounts to 2301.4 acres and 10356.3 af for Water Right No. 63-147C.
3. The Department should withdraw the order approving Transfer No. 67107 and issue an amended transfer approval to correct the irrigated acreage and diversion volume amounts to 2295.9 acres and 10331.6 af for Water Right No. 63-31197.

ORDER

IT IS HEREBY ORDERED that the order approving Transfer No. 67019 issued by the Department on February 12, 2001 and the order approving Transfer No. 67107 issued by the Department on April 10, 2001 are WITHDRAWN and AMENDED as set forth in the amended transfer approvals issued in conjunction with this order.

Dated this 1st day of June, 2001.

BOISE VALLEY IRRIGATION DITCH CO

ADDITIONAL INFORMATION

DATE: MAY 31, 2005

BY: MEL SCHULTE

The primary contact is Stan Matlock, company president. (853-0992). The company secretary is Pauly Pierce (853-5288).

The company is represented by Ringert & Clark law office, Charley Honsinger.

The primary problem associated with Boise Valley Irrigation Ditch Co is their fragmented boundary and place of use. This problem was created by several approved transfers and the fact some of their water is delivered to several shareholders by Farmers Union ditch to an area far to the West of BVID main delivery area. See the attach memo that further explains this boundary and place of use issue.

The POD's for all of BVID's rights were established by GPS except two that were added by transfer 71032 at the Shakespeare Festival site.

MTS

BOISE VALLEY IRRIGATION DITCH CO.

ADDITIONAL INFORMATION ABOUT THE BOUNDARY AND PLACE OF USE.

The boundary and place of use for the Boise Valley Irrigation Ditch Co. is not a contiguous shape due the delivery systems and several transfers that moved water from their historical area of delivery to several locations. The largest place of use is approximately 2375 acres lying in the northwest Boise and east Eagle areas.

Boise Valley's water is diverted from the Boise River into the Farmers Union canal. About 1¼ miles downstream a head gate delivers water to the Boise Valley's own canal. The Farmer's Union canal continues to carry about 785 inches of Boise Valley water downstream from the head gate to Boise Valley shareholders. Some of the 785 shares are within the Boise Valley's historic boundary and some are further to the west within the Farmer' Union boundary. This split delivery system causes a fragmented boundary and place of use for Boise Valley that overlaps with the Farmer's Union Canal Co. boundary and place of use.

Several approved transfers have established points of diversion and places of use east of Boise that also contributed to the fragmentation of the company's boundary and place of use. Transfer 67107 moved 5.5 inches of water to irrigate 5.5 acres within a 30.9 acre parcel at the Shakespear Festival site. Approved transfer 71032 moved 10 inches of water to the Shakespear site to irrigate and additional 10 acres within the 30.9 acre parcel. Transfer 5119 was approved to move 3.97 cfs to irrigate 198.4 acres at the Simplot Sports Complex and common areas in Columbia Village. This water is diverted at a pumping station in the Boise River just upstream from the Hwy 21 bridge into a pipe line that serves the Micron plant, the Simplot Complex and United Water's proposed municipal station.

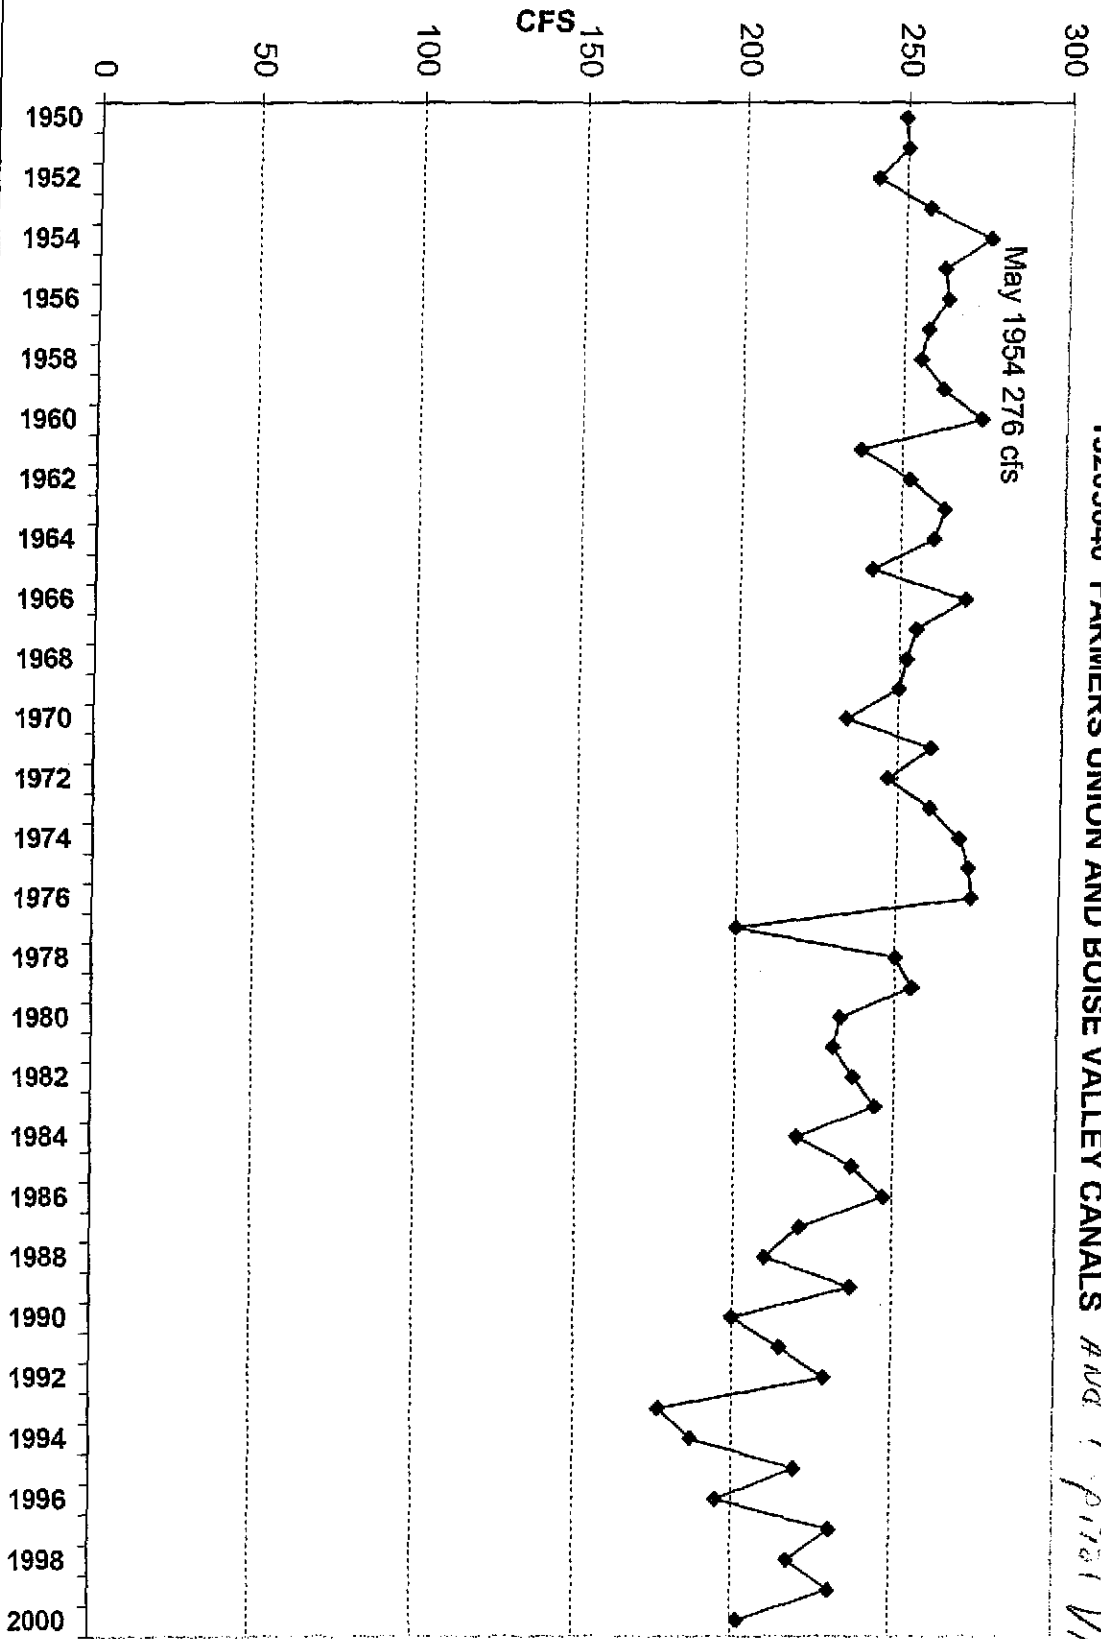

Below is a summary of the place of use acres for Boise Valley :

2375.1 acres	Within the main boundary

Re: Snake River Basin Adjudication (SRBA) claims review

We are currently reviewing the water right claims filed in the SRBA by all ditch companies and irrigation districts in Ada County prior to preparing our recommendations to the SRBA court. Your claims are part of this review process.

One of the end products resulting from the review process mentioned above will be a map for your organization that will include the land irrigated by your water rights and the outer perimeter boundary of the places of use. You may have already reviewed the boundary and place of use for your water rights with an employee of the department. However, if you have not recently reviewed and returned a map to us please call me at the number below as soon as possible. Establishing the most accurate boundary and place of use for your water rights is a very important initial step in our review process.

The total amount of water we will recommend for your water rights will be based on the standard of one inch (0.02 cubic foot per second) per acre for the actual acres irrigated with your water rights as described in your boundary map. However, it is possible to have additional water for delivery loss within your ditch system and additional water for lands that require more water due to the nature of the soils. We might need additional information from you to quantify the amount of water needed for delivery loss within your canal and ditch system. We might also need from you additional data to support and quantify any excess water in addition to one inch per acre for irrigation that might be necessary.

It is our plan to prepare recommendations for your SRBA claims during the summer of 2003. In order to prepare the most accurate recommendations it's imperative that the boundary and place of use map for your organization be completed before we proceed.

If you need additional information or want to discuss these matters in more detail please call me at the number below.

Cordially,

Mel Schulte
Sr. Water Right Agent

Mr. Dave Corbett ^{DW}
Dept. of Water Resources

Dear Dave:

Boise Valley Irrigation Dist. Co. has a problem with developers purchasing land on laterals and not using the irrigation water.

After purchasing the property they sell the water rights so they do not have to use it on the development. This can cause the other water users on the lateral to be short of water and could in some cases cause inefficient water to operate the lateral.

Boise Valley would like to require the developers to use the irrigation water on the subdivision. The objection to this is they do not have continual use. All laterals operate on a rotation schedule.

Boise Valley would like to adopt a system similar to the Gary Lane Meadows Homeowner open park area which we worked with Idaho Water Resources in obtaining water shares and assigning the share to the nearest lateral for recharge so they could pump from a shallow well or sump.

Boise Valley Dist. Co. would like to be able to require developers to keep the irrigation water in the lateral for ground water recharge and in turn be able to pump from a shallow well or sump of 10' - 12'.

The majority of Boise Valley area has a high water table.

We would like for the developers to able to install pumps in a well consisting of cement pipes stuck on top to each other in a pit or deeper than 12'. This can be excavated with a backhoe and back filled with same.

Although different in design this would be no different than Gary Lane Meadows or the Openhurst soccer field, who pump from a pond 12' to 15' deep.

Nick, Susan,

RE: POU on BLM outside digital boundary

There is a POU on BLM in your data that is outside the digital boundary for Boise Valley Irrigation Ditch Co. It appears that this could

be removed from the data as unintentional. It would save me an objection

if it could be removed. The shapefile (digital boundary) is fine.

Does it seem odd to you that the digital boundary slices through the

middle of a subdivision, and excludes part of it (see attached PowerPoint

presentation)? If there are tweaks to the digital boundary between now and

the final recommendation, please be careful to not accidentally include BLM

(snapping issue).

Fred

Rather than a snapping issue, this appears to be an issue of unintended, extra data existing outside of the shape file. If this extra data containing the SWNE POU was removed, BLM's issue would be resolved.

THIS RIGHT IS A SPLIT FROM FORMER RIGHT 63-31197.

This right is limited to the irrigation of 2779.5 acres within the boundary of the Boise Valley Irrigation Ditch Co.

Water is delivered through the Farmers Union and Boise Valley canals.

The right holder shall maintain a measuring device and lockable controlling works of a type approved by the Department in a manner that will provide the watermaster suitable control of the diversion.

Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 63.

Diversion for irrigation under this water right prior to April 1 and after October 31 shall occur only as authorized by the Water District 63 Water Master and only when water is being released by the United States from the Lucky Peak Dam outlet under procedures and requirements for the Memorandum of Agreement between the U.S. Department of the Army and the U.S. Department of the Interior for Flood Control Operations of the Boise River Reservoirs, dated November 20, 1953, the Water Control Manual for Boise River Reservoir dated April 1985 and any future amendments or revisions made thereto pursuant to state or federal procedures or law; provided that any such use of this water right prior to April 1 and after October 31 shall be subordinated to water rights for storage in Anderson Ranch Reservoir, Arrowrock Reservoir, Lucky Peak Reservoir or Lake Lowell as decreed in SRBA Case No. 39576.

The period of use for irrigation, irrigation from storage and aesthetic uses described in this approval may be extended to a beginning date of 3/1 provided that

beneficial use of the water can be shown and other elements of the right are not exceeded. Irrigation, irrigation from storage and aesthetic uses before 3/15 are subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier than the date of this approval.

This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation of the lands above.

The portion of Right 63-31832 used for conveyance losses is 5.94 cfs.
